

TruTech Tools to Connect with Contractors at Two Leading HVAC Industry Conferences

MOGADORE, OH, UNITED STATES, August 11, 2026 /EINPresswire.com/ -- [TruTech Tools](#) will connect with contractors at two of the industry's most respected educational conferences this September. The company will serve as a Gold Sponsor of the National Comfort Institute ([NCI](#)) High-Performance HVAC Summit, Sept. 1–3 in Pigeon Forge, Tennessee, and will exhibit at the [US Heat Pump Summit](#), Sept. 15–16 in Worcester, Massachusetts.

Both conferences bring together contractors, manufacturers, educators, and industry experts to exchange ideas, share practical knowledge, and explore proven approaches to improving HVAC system performance.

As a Gold Sponsor of the NCI High-Performance HVAC Summit, TruTech Tools is proud to support an event focused on measured system performance. TruTech Tools CEO Bill Spohn will present "Counterfeit Carbon Monoxide Safety: Identifying Misleading Low-Level CO Alarms and Protecting Your Customers." The session will help contractors identify misleading low-level CO alarm claims, understand legitimate product certifications, and confidently recommend carbon monoxide safety products that customers can trust. The conference also features educational sessions on airflow, combustion analysis, system diagnostics, building performance, leadership, and business development, along with opportunities to connect with peers from across the industry.

Later in the month, TruTech Tools will exhibit at the US Heat Pump Summit, where contractors, manufacturers, distributors, and industry leaders will explore the technologies, installation practices, commissioning methods, and business strategies shaping the future of heat pump applications.

Attendees at both events are invited to visit the TruTech Tools booth to explore professional instruments for airflow measurement, combustion analysis, electrical testing, thermal imaging, refrigerant diagnostics, and commissioning. The TruTech team will be available throughout each conference to answer questions, discuss specific applications, and help contractors select tools that fit the way they work.

For contractors, these events offer an opportunity to learn from experienced professionals, exchange ideas with peers, and stay current with evolving technologies and best practices. TruTech Tools is proud to participate in both conferences and looks forward to meeting

customers, industry partners, and contractors committed to delivering measurable results in the field.
