

Radiant Laser MD Opens Second Location Near Boston University and Fenway

Physician-led laser hair removal practice brings Candela GentleMax Pro® technology and flexible, pay-as-you-go pricing to Boston

BOSTON, MA, UNITED STATES, August 11, 2026 /EINPresswire.com/ -- Radiant Laser MD, a

“

Our goal is to make high-quality laser hair removal more accessible while maintaining the personalized attention, transparency, and clinical standards that have defined our Cambridge practice.”

Alba Cestari

physician-led practice specializing in [laser hair removal](#), has opened its second location at 896 Beacon Street in Boston, steps from Boston University and convenient to Fenway, Kenmore Square, Brookline, Back Bay, and Allston.

The new Boston studio expands upon the success of Radiant Laser MD's original Harvard Square location in Cambridge. It was created to provide Boston-area residents, university students, professionals, and neighborhood families with convenient access to advanced laser hair removal in a welcoming boutique setting.

The Boston location features the [Candela GentleMax Pro®](#), a dual-wavelength laser platform designed to provide fast, precise, and highly customizable laser hair removal treatments for a broad range of skin types and tones.

“Opening our second location near Boston University is an exciting step for Radiant Laser MD,” said Alba Cestari, co-founder and manager of Radiant Laser MD. “Our goal is to make high-quality laser hair removal more accessible while maintaining the personalized attention, transparency, and clinical standards that have defined our Cambridge practice.”

Advanced Laser Hair Removal for a Wide Range of Skin Tones

The GentleMax Pro combines two established laser wavelengths in one platform:

- The 755-nanometer Alexandrite laser, commonly used for lighter skin tones
- The 1064-nanometer Nd:YAG laser, which can be used for darker skin tones

Having both wavelengths allows the Radiant Laser MD team to customize treatment settings based on each client's skin type, hair color and thickness, treatment area, and individual goals.

The system also incorporates Candela's Dynamic Cooling Device™, which delivers a brief cooling spray immediately before each laser pulse to help protect the skin and improve comfort during treatment.

Laser hair removal is available for areas including the:

- Face and neck
- Underarms
- Arms and legs
- Back and chest
- Bikini and Brazilian areas
- Abdomen
- Hands and feet

Because hair growth patterns and treatment response vary from person to person, each client receives an individualized treatment plan.

A Practice Specializing in Laser Hair Removal

Radiant Laser MD has built its reputation by making laser hair removal the central focus of its practice rather than treating it as one service among many.

The practice was co-founded by Dr. Cestari, a Harvard Medical School physician, and Alba Cestari, a senior aesthetician and entrepreneur. Together, they developed a client-first model centered on experienced treatment providers, advanced laser technology, inclusive care, and clear communication.

Radiant Laser MD welcomes clients of all skin tones, body types, gender identities, and backgrounds. Each client receives an individualized assessment before treatment so the team can recommend an appropriate and realistic treatment plan.

Transparent, Pay-As-You-Go Pricing

Unlike practices that require clients to purchase expensive prepaid packages or enter long-term contracts, Radiant Laser MD offers straightforward, pay-as-you-go pricing.

Clients pay for each session individually, giving them greater flexibility and control over their treatment plan. Pricing is clearly communicated in advance, with no membership requirement, hidden fees, or high-pressure sales process.

"We believe clients should be able to make informed decisions without being pressured into

Alba Cestari at Radiant Laser MD Boston with GentleMax Pro® by Candela

purchasing a large package before they know how they will respond to treatment,” Dr. Cestari said. “Our approach is built around trust, flexibility, and delivering an excellent experience at every visit.”

Conveniently Located Near Boston University
