

Renewable America and Renewable America Services Named to 2026 Top Solar Contractors List

Renewable America Companies Underscore How Community-Scale Solar plus Storage Projects Are Gaining Market Traction

SANTA CLARA, CA, UNITED STATES, August 12, 2026 /EINPresswire.com/ -- SANTA CLARA, Calif. — [Renewable America](#) ranks among the Top 3 solar developers in California, and [Renewable America Services](#) -- its EPC subsidiary -- ranks among the Top 4 EPCs in the state on the 2026 Top Solar Contractors List. [Solar Power World](#) recently released the 15th-anniversary edition of the company list, the solar industry's most prestigious ranking of solar and energy storage companies

Picture of the largest new build solar and storage project on California's North Coast.

Renewable America was founded in 2020. Renewable America Services was established in 2022 to bring engineering, procurement and construction capabilities in-house. Both companies are led by Founder and CEO Ardi Arian and are headquartered in Santa Clara, California. The Top Solar Contractors List is the most recognized annual listing of solar contractors in the United States. Companies on the list are grouped and ranked by specific service, market and state based on 2025 installed capacity (in kW DC).

“

Being recognized as both a top developer and a top EPC in California...reflects how we've built this company -- as a single team that can take a project from interconnection through construction.”

Ardi Arian

2025 HIGHLIGHTS -- RENEWABLE AMERICA (DEVELOPER)

Renewable America has installed 22.6 MW of solar power since its inception, including these notable projects in 2025:

- Foster Clean Power A and B (4.46 MWdc and 4.95 MWdc) in Humboldt County — California's North Coast's largest new-build community solar and storage project, featuring 10.4 MWh of battery storage under a PPA with Redwood Coast Energy Authority.
- Dos Palos Clean Power (4.29 MWdc) in Merced County, delivering renewable energy and bill discounts of up to 20% to 2,600 income-qualified WestLight Energy customers.
- Ranch Sereno Clean Power (2.59 MWdc) in Contra Costa County, which achieved Full Notice to Proceed in August 2025.
- Three commercial projects for Pearl Crop, a family-run nut processing business in San Joaquin County. The Stockton facility alone projected to meet 86% of Pearl Crop's energy needs and deliver an estimated \$230,000 in annual utility cost savings.

2025 HIGHLIGHTS — RENEWABLE AMERICA SERVICES (EPC)

Renewable America Services, a California-licensed contractor (CSLB License #1096030, General B and C-10) has completed more than 20 MW of solar and 10 MWh of energy storage since its inception, including 15.4 MW installed in 2025. Notable 2025 projects include:

- Foster Clean Power A and B in Arcata — Humboldt County's first and largest new-build community solar and storage project, with both projects exceeding the 95% Guaranteed Generation Capacity threshold.
- Dos Palos Clean Power in Merced County which came online after overcoming three consecutive Conditional Use Permit appeals before construction could begin.
- Three commercial rooftop solar PV installations for Pearl Crop in San Joaquin County, engineered across more than 251,000 square feet of active industrial rooftop without complete as-built drawings, requiring custom structural assessments developed in the field with the project's structural engineering team.

Together, Renewable America and Renewable America Services represent a combined pipeline of more than 35 community-scale projects representing 199 MW of solar and 465 MWh of energy storage under development throughout California.

"Being recognized as both a top developer and a top EPC in California in the same year reflects how we've built this company — as a single team that can take a project from interconnection through construction," said Ardi Arian, Founder & CEO of Renewable America and Renewable America Services. "It's a reflection of the work our engineering and construction teams have put in across every one of these projects."

ABOUT RENEWABLE AMERICA

Renewable America is building the next generation of clean energy infrastructure across California. Its growing pipeline of solar-plus-storage projects delivers reliable, locally sourced electricity to Community Choice Aggregators (CCAs), businesses and utilities. The company

partners directly with customers with high energy demands to cut electricity costs and reduce their carbon footprint.

ABOUT RENEWABLE AMERICA SERVICES

Renewable America Services is a California-based solar EPC and general contractor (CSLB License #1096030, General B and C-10) and delivers community-scale and commercial solar and solar-plus-storage projects. The company provides in-house engineering, procurement, construction, commissioning and CAISO integration services across the full project lifecycle.

ABOUT SOLAR POWER WORLD

Solar Power World is the leading online and print resource for news and information regarding solar installation, development and technology.
