

Neeraj Sabharwal, Co-Founder of Trust3 AI, Accepted into Forbes Technology Council

Trust3 AI Co-Founder Neeraj Sabharwal joins Forbes Technology Council to share insights on agent security, enterprise AI, and measurable AI ROI.

SAN FRANCISCO, CA, UNITED STATES, August 12, 2026 /EINPresswire.com/ -- Sabharwal, Co-

“

Follow me on Forbes Technology Council, where I'll be publishing articles on agent security, enterprise AI, and how organizations can turn AI investments into measurable business ROI”

Neeraj Sabharwal, Co-Founder, Trust3 AI

Founder of [Trust3 AI](#), an enterprise agent security company helping organizations deploy AI agents safely and turn AI investment into measurable business value, has been accepted into Forbes Technology Council, an invitation-only community for world-class CIOs, CTOs, and technology executives.

Sabharwal was selected by a review committee based on the depth and diversity of his experience, business impact, and professional achievements.

As a member of the Council, Sabharwal will connect and

collaborate with other respected technology leaders in a private forum. He will also have the opportunity to share expert insights in original articles and contribute to published Expert Panels alongside other experts on Forbes.com.

Finally, Sabharwal will benefit from exclusive access to membership-branded marketing collateral, high-touch support from the Forbes Councils member concierge team, and complimentary membership in EXEC, the luxury hotel, travel, lifestyle, and business benefits program.

"I am honored to join Forbes Technology Council at a defining moment for enterprise AI," said Sabharwal. "Companies have moved beyond asking whether they should invest in AI. The real question is how to turn that investment into measurable ROI without introducing new security, access, and operational risks. Agent security is becoming foundational to that equation. At Trust3 AI, we are focused on helping enterprises deploy AI agents with the controls, visibility, and confidence required to move from experimentation to production and business impact at scale. I look forward to exchanging ideas with fellow technology leaders and sharing practical lessons from the front lines of enterprise AI adoption."

ABOUT TRUST3 AI

Trust3 AI is the security control plane for enterprise AI and agents. Founded by Balaji Ganesan, Don Bosco Durai, and Neeraj Sabharwal, the company delivers AI-powered Agent Security through its One Control Plane architecture, powered by a Unified Trust Layer built on AI-native metadata and context. The platform enables enterprises to discover every agent, observe every decision, and secure every action across any framework, cloud, and data source.

Trust3 AI is a member of the NVIDIA Inception program and the Snowflake Startup Accelerator. Learn more at trust3.ai or request a demo at trust3.ai/demo.

ABOUT FORBES COUNCILS

Forbes Councils is a collective of invitation-only communities created in partnership with Forbes and the expert community builders who founded Young Entrepreneur Council (YEC). In Forbes Councils, exceptional business owners and leaders come together with the people and resources that can help them thrive.
