

EVERRATI DEBUTS CYPRESS COMMISSION AT MONTEREY CAR WEEK

The First US Market, Left Hand Drive Mercedes Benz SL 'Pagoda' Leads a Trio of One of One Commissions, Joined by the Skibo Castle and Evergreen Commissions

Everrati North America, Inc.

IRVINE, CA, UNITED STATES, August 12, 2026 /EINPresswire.com/ -- [Everrati](#), the luxury electric automotive house redefining some of the world's most important cars, will present its first US market, left hand drive Mercedes Benz SL W113 "Pagoda," named the Cypress Commission, during Monterey Car Week (Aug. 7 to 16). The debut marks a key milestone in Everrati's North American expansion and gives collectors and car aficionados first chance to drive a Pagoda redefined specifically for modern American use.

Inspired by California's Central Coast, the Cypress Commission blends effortless elegance, open air freedom, and refined electric performance, preserving the visual purity and balanced proportions that have made the W113 one of the most enduring designs in automotive history. Power comes from a 68kWh, 500V powertrain producing 300bhp and 300Nm of torque, for an estimated range of more than 230 miles and 0 to 60mph in under 7.0 seconds. Regenerative braking, AC and DC fast charging, and an estimated weight of 1,500kg preserve the balance and composure expected of a Mercedes Benz SL.

"The Cypress Commission is a landmark car for Everrati, our first Pagoda created specifically for the US market and in left hand drive. California is a natural home for the Pagoda: elegant without being showy, designed for open air driving, and understood by people who value design as much as performance. Monterey Car Week is the perfect stage to introduce it to America." Justin Lunny, Founder and CEO, Everrati.

Cypress will be joined by two further Everrati commissions: the one of one Land Rover Series IIA, created with The Carnegie Club as the Skibo Castle Commission and rich in Scottish craft and provenance, and the US market, left hand drive Porsche 911 (964) RSR Evergreen Commission, carrying a strong motorsport, family, and collector story. Together, the three cars demonstrate Everrati's approach to commissioning, craftsmanship, and software led electric redefinition across three very different automotive icons.

Each commission will be on display by appointment throughout Monterey Car Week: Cypress on Thursday, August 13 at Legends of the Autobahn (Pacific Grove Golf Links, 9am to 3pm), Skibo Castle on Friday, August 14 at Werks Reunion (Monterey Pines Golf Course, 7am to 5pm), and Evergreen on Saturday, August 15 at Benzes at the Barnyard (The Barnyard, Carmel, 10am to 2pm).

Everrati electrifies the icons of today and, through Powered by Everrati, powers the icons of the future. For more information on Everrati at Monterey Car Week 2026, visit everrati.com/monterey-car-week-2026-full-guide-schedule-faq/. Images can be found [here](#).

About Everrati

Everrati is a luxury electric automotive house redefining iconic vehicles for a new generation of custodians. Each Everrati commission combines world-class craftsmanship with advanced electric propulsion and the company's proprietary EverCore software and vehicle-control platform. The result preserves the design, character and cultural significance of each vehicle while creating an experience suited to contemporary use. Through Powered by Everrati, the company also provides its propulsion, software and vehicle-integration expertise to specialist manufacturers, luxury brands and creators of the next generation of iconic vehicles. Everrati operates in the United Kingdom and the United States, with its North American operations based in Irvine, California.

Trademark Statement

Everrati restores and modifies existing classic and iconic vehicles for its customers. Everrati does not manufacture vehicles and is not sponsored, associated, approved, endorsed or affiliated with Mercedes-Benz or any subsidiary or representative of Mercedes-Benz Group AG. The Mercedes-Benz name and crest are trademarks of Mercedes-Benz Group AG. All trademarked names and marks are used solely for identification and reference.
