

Asphalt Coatings Company Scales Paving Operations Across Denver and Colorado Springs

COLORADO SPRINGS, CO, UNITED STATES, August 12, 2026

/EINPresswire.com/ -- Asphalt Coatings Company in Colorado Springs, CO an established commercial pavement contractor serving the Front Range and Pikes Peak regions since 1986, with nearly four decades of hands-on paving experience has officially announced an expansion of its regional service capabilities. The operational scale up increases mobile crew deployment and material logistical support to address surging commercial, industrial, and municipal infrastructure demands across Denver, Colorado Springs, Aurora, Parker, Fort Collins and Boulder.

The regional initiative comes as commercial property managers and facility directors prioritize long term asset management and preventative surface maintenance to combat harsh high-altitude climate conditions across Colorado.

Full Scope Asphalt and Concrete Engineering Solutions

Commercial properties require heavy duty surface solutions capable of withstanding heavy vehicular traffic and freeze thaw cycles. To meet these demands, the company has expanded its portfolio of [comprehensive paving and concrete services](#) built around CDOT-approved materials engineered specifically for Colorado's freeze-thaw cycles and high-altitude UV exposure. This includes high capacity asphalt paving, precision milling, asphalt repair, full depth patch repairs, sealcoating, crack sealing, parking lot striping, and structural parking lot replacement projects.

Project experience spans routine lot maintenance to large-scale builds exceeding 200,000 square feet for industrial and distribution clients.

In addition to asphalt operations, the firm specializes in structural concrete flatwork and concrete repair engineered to keep commercial sites functional, safe, and fully compliant. Field crews handle the construction and repair of sidewalks, curbs, gutters, drain pans, and ADA compliant pedestrian access ramps. By combining asphalt and concrete operations under a single project management team, staffed entirely by in-house crews rather than subcontractors, the firm streamlines multi-phase site upgrades for retail centers, industrial parks, and multi-family residential complexes.

Targeted Support for the Colorado Springs and Pikes Peak Region

A major focal point of the firm's expanded footprint is providing dedicated [Colorado Springs asphalt paving](#) and pavement preservation. Localized crews focus on proactive parking lot maintenance strategies such as high-durability parking lot sealcoating and line striping that shield asphalt surfaces from oxidation, petroleum spills, and water intrusion before structural degradation occurs.

"Commercial pavement is one of the most substantial capital assets on any property," stated a representative for the firm. "Our focus is providing planned, phase based solutions that protect property values, minimize tenant disruption, and extend the operational lifespan of every surface we service."

Property owners and facility managers across the Denver metro and Pikes Peak regions can request a site evaluation or detailed estimate directly through the company's online portal: <https://asphaltcoatingscompany.com/contact/>

Streamlined Project Scheduling and ADA Compliance Standards

In addition to core surface installations, the firm has enhanced its specialized project management services to minimize operational downtime for active business locations. Understanding that parking lot disruptions can impact customer access and tenant operations, the company works closely with property managers to implement phased construction schedules, night shifts, and off peak paving protocols. This strategic scheduling ensures smooth traffic flow while critical repairs take place. Furthermore, the updated service capabilities emphasize strict adherence to local municipal codes and Americans with Disabilities Act (ADA) accessibility guidelines, ensuring proper slope gradients, parking space dimensions, signage, and truncated dome installation for safer, compliant commercial grounds.

About Asphalt Coatings Company

Founded in 1986, Asphalt Coatings Company is a premier [asphalt contractor](#) providing commercial and industrial pavement solutions across the Front Range of Colorado. Operating throughout Denver, Colorado Springs, Aurora, Parker, Fort Collins, Boulder, and surrounding areas, the company delivers durable paving, resurfacing, preventative maintenance, and concrete flatwork. Committed to safety, quality craftsmanship, and long-term pavement management, the firm helps property owners protect their investments with reliable, long lasting surface solutions.
