

OneClik Launches AI-Powered Bug Reporting That Turns User Feedback Into Complete, Actionable Tickets

OneClik helps report a bug and get feedback , AI drafts the ticket with screenshots, logs, and session data attached, then routes it straight into your systems.

CA, UNITED STATES, August 17, 2026 /EINPresswire.com/ -- August 17, 2026 - OneClik today launched its AI-powered bug reporting and feedback tool in the United States. OneClik lets any user report a bug, request a feature, or share feedback from inside an app in a single click, with the screenshots, console errors, network logs, device details, and session metadata a team needs to reproduce the issue attached automatically. [Read more](#) about how it works.

OneClik Logo

OneClik is built to close the gap between vague user reports and the complete tickets engineers can actually act on. Instead of the back-and-forth of "can you reproduce it?", a report arrives fully triaged. From any page in an app, a user opens OneClik, picks Bug, Idea, or Feedback, captures

“

We believe no bug should ever need a follow-up question. OneClik uses AI to capture the problem, draft the ticket, and deliver it ready to resolve, so teams investigate less and build more.”

*Tiago Gonçalves, CEO of
InnoWave Technologies LLC*

the issue - including a video recording of the error if needed - adds an optional annotation, and sends. OneClik's AI drafts the title, description, and severity, while console logs, network activity, device information, and session data are captured in the background.

Reports are categorized automatically and route directly into your systems or into the built-in OneClik dashboard, where teams can view analytics and trends across products, pages, and users.

Key capabilities include:

-One-click capture for bugs, feature requests, and

feedback

- AI-drafted titles, descriptions, and severity for every report
- Automatic screenshot, video, console log, and network log capture
- Device and session metadata attached to every report

- Automatic categorization of incoming reports
- Jira integration and a built-in OneClik admin dashboard
- Analytics and insights across products, pages, and users

About OneClik:

OneClik is a product of InnoWave Technologies LLC. Its an AI-powered bug reporting and feedback tool that turns a single user click into a complete, actionable ticket. OneClik is delivered as an embeddable web widget that installs with a two-line script and works with React, Vue, Svelte, and vanilla JavaScript. The widget is white-labeled to match a product's own brand. OneClik is available today with a free tier for small teams. Teams can [Start free](#) and connect a project in about a minute.
