

Promising Solutions Marks 20 Years of Secure IT, Cloud, and Microsoft 365 Solutions for SMBs

Burbank-based IT company marks 20 years supporting SMBs with managed IT, cloud, Microsoft 365, cybersecurity, telecom, and technical support.

BURBANK, CA, UNITED STATES, August 12, 2026 /EINPresswire.com/ --

[Promising Solutions](#), a Burbank-

headquartered managed IT services company Los Angeles SMBs, law firms, and dental offices rely on, marks 20 years of delivering secure IT infrastructure, cloud migrations, Microsoft 365 transformation, cybersecurity, telecommunications, and technical support to small and mid-sized businesses across Greater Los Angeles.

Promising Solutions, one of the established managed IT services providers in the Los Angeles area, has served SMBs and law firms throughout Southern California since its founding in 2005. Under the leadership of CEO Ari Movsesian, who brings over 20 years of strategic and technical experience, the company operates as a unified IT partner — managing Microsoft 365, cloud infrastructure, cybersecurity, help desk, backup, and business phone systems under one roof. The company's core values — integrity first, continuous improvement, client partnership, and outcome-focused delivery — have guided its approach throughout the past two decades.

"Reaching this 20-year milestone reflects the trust that Los Angeles businesses have placed in our team," said Mr. George Woods, Media Relations Manager at Promising Solutions. "From a small Burbank team focused on proactive maintenance and honest recommendations, the company has grown by staying accountable to the businesses we serve — named engineers who learn each client's operations, face-to-face service when remote support is not enough, and technology roadmaps built around how teams already work."

The company's approach to managed IT begins with listening. Before recommending tools or migrations, the Promising Solutions team takes time to understand how a client's staff works, where technology creates friction, and what growth looks like over the coming years. From there, the company builds a roadmap that balances quick wins with long-term stability. Because all layers — managed IT and help desk, cybersecurity, Microsoft 365, cloud infrastructure, backups,

and business phone systems — are managed by one accountable team, nothing falls through the cracks between vendors.

Promising Solutions provides a range of services designed to address the operational and security needs of SMBs:

- Cloud migrations and Microsoft 365 transformation
- Managed IT services and help desk support
- Cybersecurity controls, continuous monitoring, and patching
- Disaster recovery planning and tested backups
- Telecommunications and business phone systems
- Round-the-clock monitoring backed by automation and modern Microsoft tooling

Security and reliability sit at the center of the company's work. Promising Solutions follows established frameworks and industry guidance, including the resources published by CISA for small and mid-sized businesses, to keep client environments current with continuous monitoring, patching, and tested backups.

The company's mission — to simplify IT for businesses by delivering dependable, scalable, and secure solutions that let clients concentrate on their core operations — is reflected in the experiences of its long-term clients.

Mark C., a business client, shared: "Ari and his team are true professionals who know what they are doing. I have used them several times, both for the design of my network and computers as well as technical issues that I could not overcome. Not only did they resolve the technical problems, they did so immediately so my business was not interrupted. I could not recommend Promising Solutions more."

Headquartered in Burbank with presence across the San Fernando Valley and Downtown Los Angeles, Promising Solutions pairs face-to-face service with enterprise process: structured tooling, rapid response, and local engineers rather than excessive offshoring. The company serves businesses across Glendale, Pasadena, North Hollywood, Van Nuys, Encino, Woodland Hills, Century City, Culver City, Burbank, Downtown LA, and the broader San Fernando Valley.

Kendall B., another client, noted: "Ari and his team at Promising Solutions are highly competent in their network services and very quick to reply to any questions and technical issues that may arise 24/7. They work hard to ensure a smooth computing environment and I highly recommend them."

Armenak K., whose law firm has worked with Promising Solutions for several years, added: "I find the professionals there to be knowledgeable, thoughtful, forward-thinking, responsive, trustworthy and generally easy to work with. They keep abreast of the cutting-edge technology that impacts law firms and help us stay a step ahead."
