

Class Factor Launches Free AI Study Platform to Help Students Get Exam-Ready

New platform turns class materials into flashcards, quizzes, practice tests, AI explanations, and personalized study coaching.

BOCA RATON, FL, UNITED STATES, August 12, 2026 /EINPresswire.com/ -- [Class Factor](#) today announced the launch of its AI-powered study platform designed to help students turn class materials into personalized study tools for upcoming exams.

Class Factor AI Study System

Class Factor allows students to upload notes, PDFs, slides, videos, images, study guides, and other class materials. The platform then helps generate flashcards, quizzes, practice tests, and AI-powered explanations based on the student's own course content.

“

Students need more than just flashcards. They need a smarter way to stay organized and understand what they are getting wrong, and keep moving before an exam.”

Marshall Golub

Unlike basic [flashcard generators](#), Class Factor is designed as a complete study system. In addition to creating study materials, the platform includes an [AI Tutor](#) that helps explain confusing answers, quiz mistakes, and difficult concepts. Class Factor also includes an AI Study Coach that uses student-provided onboarding information, exam dates, study habits, and platform activity to help keep students on track before test day.

“Students need more than just flashcards.” said Marshall

Golub of Class Factor. “They need a smarter way to stay organized, understand what they are getting wrong, and keep moving before an exam. Class Factor was built to give students a simple AI study system they can actually use.”

The AI Study Coach is designed to help students stay engaged by sending study reminders, exam reminders, motivational messages, and personalized insights based on how they are using the platform. For example, if a student has an upcoming exam and performs poorly on a quiz

section, Class Factor can help identify weak areas and suggest what to review next.

Class Factor is free to start and gives students access to core study features, including flashcard generation, quiz generation, AI Tutor support, and AI Study Coach functionality. Optional upgrades are available for students who need higher usage limits, larger uploads, or access to more advanced AI features.

The platform is designed for high school, college, and graduate students who want to study more efficiently from the materials they already have.

Class Factor is available now at <https://www.classfactor.com>.

About Class Factor

Class Factor is an AI-powered study platform that helps students turn class materials into flashcards, quizzes, practice tests, AI explanations, and personalized study coaching. Built for students preparing for exams, Class Factor helps users study from their own notes, slides, PDFs, videos, images, and study guides while staying on track before test day.

Class Factor is operated by First Capital Merchant Solutions, Inc., doing business as Class Factor.
