

Perixx Celebrates International Left-Handers Day with Mice Designed for the Left Hand

Perixx celebrates International Left-Handers Day with ergonomic left-handed mice designed for different hand sizes, needs, and workspaces.

DÜSSELDORF, NRW, GERMANY, August 13, 2026 /EINPresswire.com/ -- Düsseldorf, Germany – From scissors and notebooks to computer accessories, left-handed people often navigate a world designed with right-handed users in mind. On International Left-Handers Day, Perixx is celebrating left-handed users by highlighting mouse solutions designed to offer greater comfort, choice, and flexibility.

[PERIMICE-713LRX](#): Wireless Comfort for the Left Hand

The PERIMICE-713LRX is a rechargeable wireless vertical mouse specifically designed for left-handed users. Its ergonomic vertical shape encourages a more natural hand and wrist position, while quiet-click buttons and a 2.4 GHz wireless connection make it suitable for everyday office and home use. For added convenience, it supports both USB-C and wireless charging, with a wireless charging pad included.

[PERIMICE-513L](#): Simple, Reliable and Ergonomic

For users who prefer a wired connection, the PERIMICE-513L offers a dedicated left-handed vertical design with six buttons and adjustable 1000/1600 DPI sensitivity. Its plug-and-play USB connection provides a straightforward ergonomic solution without batteries, charging, or wireless connectivity to manage.

A Better Fit for Different Hand Sizes

The PERIMICE-713LR and PERIMICE-513L feature larger ergonomic shapes suited to users with larger hands. For smaller hands, Perixx also offers more compact alternatives: the PERIMICE-719RXL and PERIMICE-519L.

These options allow left-handed users to choose a mouse based not only on features and connectivity, but also on the size and fit that feels most comfortable.

[PERIMICE-209C](#): One Mouse for Either Hand

Not every left-handed user needs a dedicated left-handed mouse. The PERIMICE-209C features a symmetrical, ambidextrous design suitable for both left- and right-handed users, making it practical for shared workstations, offices, schools, and households.

Giving the Left Hand the Right Choice

Observed every August 13, International Left-Handers Day raises awareness of the everyday experiences of left-handed people in a predominantly right-handed world.

For Perixx, the occasion reflects an important principle of ergonomic design: technology should adapt to the people using it — not always the other way around.

This International Left-Handers Day, give the left hand the right mouse.
