

Cutting Edge Laser Technologies and ASA Deepen Partnership with Strategic Investment, Extended Distribution Agreement

Exclusive distribution agreement extended to 2033, deepening partnership bringing MLS® Laser Therapy to thousands of medical & vet practices in North America

ROCHESTER, NY, UNITED STATES,
August 12, 2026 /EINPresswire.com/ --

Cutting Edge Laser Technologies, a leading provider of laser therapy systems for the medical, veterinary and aesthetic markets, today announced that it has accepted a strategic investment from ASA, its longtime manufacturing partner and the developer of the Multiwave Locked System® (MLS®) technology. As part of the transaction, the companies have extended their exclusive distribution agreement through 2033.

The investment will support Cutting Edge's accelerated growth strategy, including expansion into new clinical specialties, continued investment in sales and service infrastructure, and further development of the education and clinical support programs that customers rely on.

Cutting Edge and ASA have worked together for almost two decades, a partnership that has established MLS® Laser Therapy as a trusted treatment modality in more than 6,000 practices across North America. Today, Cutting Edge serves a customer base of 10,000+ medical professionals across its medical, veterinary and aesthetics divisions. The company is also celebrating its 25th anniversary in 2026.

"Our relationship with Cutting Edge has always been built on more than distribution. Together we have advanced the science of laser therapy and brought it to clinicians who might never have encountered it otherwise," said Damiano Guidolin, General Manager of ASA. "This investment reflects our confidence in the Cutting Edge team and our shared belief that the best years of this partnership are ahead of us. Extending our agreement through 2033 gives both companies the runway to invest, innovate, and grow."

"This is the natural next step in a partnership that has defined both of our companies," said

Mark Mollenkopf, President and Chief Operating Officer of Cutting Edge Laser Technologies. "ASA builds the finest laser therapy technologies in the world, and for 20+ years our job has been to put it in the hands of clinicians who can change patient outcomes with it. Having our manufacturing partner invest directly in our growth, and commit to us through 2033, lets us plan and build further out than any point in our history. For our customers, it means the same thing as it's always meant; better medicine and better business."

About Cutting Edge Laser Technologies

Founded in 2001 and headquartered in Rochester, New York, Cutting Edge Laser Technologies is the exclusive North American distributor of MLS® Laser Therapy systems. Serving more than 10,000 medical professionals in North America across medical, veterinary and aesthetics specialties, Cutting Edge pairs clinically proven technology with the training, marketing, and practice-development support that help providers deliver Better Medicine and Better Business.
