

TaxPulse Launches All-in-One Operating System for Tax Professionals

New platform consolidates up to 15 separate tools into one system for tax offices and service bureaus, with plans starting at \$4,999 a year

FAJARDO, FAJARDO, PUERTO RICO, August 12, 2026 /EINPresswire.com/ -- TaxPulse Incorporated today launched TaxPulse, an all-in-one tax and business operating system for tax professionals, multi-office practices and [service bureaus](#). The platform, available now at [taxpulse.biz](#), combines [tax preparation](#) and e-filing for federal and all 50 state returns with 23 integrated modules covering practice management, client communication, marketing, bookkeeping and payroll.

“ Tax professionals have been paying more every year for a pile of tools that do not talk to each other”
Justin Rivera

Most tax offices today run on a patchwork of 10 to 15 disconnected subscriptions: one product for tax preparation, another for client intake, and separate tools for e-signatures, document storage, marketing, bookkeeping and payroll. TaxPulse replaces that stack with a single platform under one login and one bill, which the company estimates can save a practice up to \$26,093 per year compared with buying the tools separately.

"Tax professionals have been paying more every year for a pile of tools that do not talk to each other," said Justin Rivera, chief operating officer of TaxPulse. "We built the entire office into one system, priced it below what many practices pay for [tax software](#) alone, and we are putting it head to head against every legacy platform in this industry starting this season."

The platform's modules include tax preparation with e-file for federal and all 50 states, a CRM with client pipelines and onboarding journeys, secure document vaults with e-signature, an email and SMS marketing suite with a website builder, workflow automation, bookkeeping, payroll, project management, a training platform and a mobile app. Built-in due diligence enforcement supports Form 8867 compliance, and the system uses bank-grade encryption with SOC 2-aligned controls. Pricing starts at \$4,999 per year for a single tax office, \$9,999 per year for service bureaus with up to 25 offices and \$39,999 per year for enterprise networks of up to 50 offices. For individual taxpayers, TaxPulse offers AI-assisted filing priced per return.

TaxPulse will demonstrate the platform publicly for the first time at the IRS Nationwide Tax Forum in Orlando, Fla., Sept. 1-3, ahead of the 2027 filing season.

Tax professionals and service bureaus can see pricing, request a demonstration or sign up now at taxpulse.biz.
