

# CQT Media and Publishing Releases 'Heavy With Joy: From An AI Adoptee, Prompted And Edited By A Real Adoptee'

*Can AI help tell the stories of adoptees? Heavy With Joy is an extraordinary experiment in storytelling and a bold new way to give voice to adoptee experiences*

ST. PAUL, MN, UNITED STATES, August 12, 2026 /EINPresswire.com/ -- CQT Media and Publishing today announced the release of "[Heavy With Joy: From An AI Adoptee, Prompted and Edited By A Real Adoptee](#)", a contemporary poetry collection by Emeritus Brown that explores identity, love, relationships, memory, and belonging through the lens of transracial and international adoption, blurring the boundaries between technology and humanity

Created through an extended collaboration between artificial intelligence and human editorial direction, "Heavy With Joy" challenges conventional ideas about authorship while remaining firmly rooted in lived experience. The collection asks not whether artificial intelligence can replace human creativity, but whether it can become another medium for expressing it.

Drawing upon themes familiar to many in the adoptee community, as well as other marginalized communities, the poems invite readers into Brown's own reflections on the search for identity, weaving together a collection that is both intimate and universal.

"Every poem was measured against one standard," said Emeritus Brown. "Did it reveal something emotionally true? Technology generated possibilities, but the human voice determined what remained."

"Heavy With Joy: From An AI Adoptee, Prompted and Edited By A Real Adoptee" [is now available in paperback through Amazon](#).
