

SKINEEZ® and Lovell Government Services Expand Access to Next-Generation Hydrating Compression Across Federal Healthcare

Woman-owned, Made-in-USA compression innovation is now available through Lovell to federal healthcare customers across

PENSACOLA, FL, UNITED STATES, August 13, 2026 /EINPresswire.com/ -- SKINEEZ®, a patented hydrating compression and skincarewear platform, today announced expanded federal availability through Lovell Government Services, a Service-Disabled Veteran-Owned Small Business (SDVOSB) specializing in government healthcare procurement. The partnership gives federal clinicians and purchasing teams a streamlined path to a broad portfolio of compression socks, stockings, sleeves, gloves, and specialty garments engineered to unite therapeutic compression with continuous skin-conditioning comfort.

“

Together with Lovell, we are opening a clearer path for federal clinicians and procurement teams to access American-made innovation designed to care for the people who protect and serve our country.”

Michelle Moran, Founder and CEO of SKINEEZ

The portfolio is available for procurement across the Department of Defense and its military branches—the

Army, Navy, Air Force, Marine Corps, Coast Guard, and Space Force—as well as the Department of Veterans Affairs, Indian Health Service, and other eligible federal healthcare organizations. Availability does not imply endorsement by, or adoption across, every named agency or branch.

“This is bigger than a product launch. It is a new standard of care and comfort for the people who serve.”

Traditional compression can be difficult to wear consistently when skin is dry, fragile, or uncomfortable. SKINEEZ addresses that challenge by combining graduated compression with patented microencapsulation technology that releases skin-conditioning ingredients during wear. The result is a differentiated platform built around two goals that matter in federal care:

therapeutic performance and a better wearing experience that may support adherence.

“From an active-duty service member preparing for the next mission to a Veteran managing a chronic condition, comfort can determine whether compression therapy stays in the drawer or becomes part of daily life,” said Michelle Moran, Founder and CEO of SKINEEZ. “Together with Lovell, we are opening a clearer path for federal clinicians and procurement teams to access American-made innovation designed to care for the people who protect and serve our country.”

A Platform Built for the Full Continuum of Service.

SKINEEZ is positioned to support a wide range of clinician-directed compression and recovery needs, including lymphedema and edema management, chronic venous conditions, post-operative recovery, prolonged standing, travel-related swelling, skin comfort, and physical recovery. Product selection, compression level, and intended use should be matched to each product’s labeling and the patient’s clinical needs. The portfolio includes more than 145 product configurations spanning compression socks and stockings, arm and leg sleeves, gloves, and specialty garments. This breadth gives federal healthcare teams options for different anatomical needs, compression levels, care settings, and patient populations while consolidating access through Lovell’s established federal contracting channels.

American Innovation, Federal Reach.

SKINEEZ is proudly woman-owned and Made in the USA. Through Lovell, that domestic innovation is paired with federal market expertise, contract access, and procurement support—helping reduce friction between an identified clinical need and the product reaching the provider or patient.

“Lovell exists to help federal healthcare professionals find and procure meaningful innovations that can improve care for military members, Veterans, and federal beneficiaries,” said Chris Lovell, Major, USMC (Ret.), CEO of Lovell Government Services. “SKINEEZ brings a distinctive combination of compression, skin-conditioning technology, patient comfort, and American manufacturing. We are proud to help make the portfolio accessible through our federal contracting channels.”

One Partnership. A Nationwide Opportunity to Serve.

The SKINEEZ-Lovell partnership creates a platform for education, evaluation, and procurement across military treatment facilities, VA medical centers, federal clinics, occupational health programs, and other authorized government care settings. Federal buyers and healthcare professionals can contact Lovell Government Services to identify applicable products, contracting pathways, and ordering information.

About SKINEEZ®

SKINEEZ® develops patented hydrating compression and skincarewear that combines graduated compression with skin-conditioning technology designed to improve comfort during wear. Proudly woman-owned and Made in the USA, SKINEEZ products are offered through healthcare, pharmacy, retail, and federal procurement channels. Product regulatory status and claims vary by SKU; consult the applicable product labeling for intended use and clearance information.

About Lovell Government Services

Lovell Government Services has been a trusted Service-Disabled Veteran-Owned Small Business (SDVOSB) vendor since 2013 with a proven track record of helping suppliers succeed in the federal marketplace. As a five-time Inc. 5000 honoree, Lovell partners with medical, dental, pharmaceutical, and healthcare technology companies to expand access to federal healthcare systems while helping agencies streamline procurement and improve patient care for Veterans, military personnel, and other federal beneficiaries.
