

IronOrbit Named a Visionary in the 2026 Gartner® Magic Quadrant™ for Desktop as a Service

ANAHEIM HILLS, CA, UNITED STATES, August 13, 2026 /EINPresswire.com/ -- IronOrbit, a specialized cloud service provider of AI-ready [Desktop as a Service](#) (DaaS) and [managed IT solutions](#), announces that it has been recognized in the 2026 Gartner® Magic Quadrant™ for Desktop as a Service for the fourth consecutive year. IronOrbit holds this recognition as an additional testament to its continued commitment to delivering enterprise-class Desktop as a Service solutions powered by innovation and AI.

“Gartner® Magic Quadrant research methodology provides a graphical competitive positioning of four types of technology providers in fast-growing markets: Leaders, Visionaries, Niche Players and Challengers.” IronOrbit was one of just 15 vendors worldwide included in the 2026 Magic Quadrant. In our opinion, this recognition reflects the company's continued investment in secure, high-performance Desktop as a Service solutions that help organizations modernize IT, embrace AI-powered applications and workflows, and support today's distributed workforce with confidence.

“ We believe this recognition reflects our unwavering commitment to innovation, customer success, and delivering enterprise-grade Desktop as a Service solutions that empower organizations”
Alexander Saca, CEO

“For us, being recognized in the Gartner Magic Quadrant for the fourth consecutive year is a significant milestone

for IronOrbit,” said Alexander Saca, CEO of IronOrbit. “We believe this recognition reflects our unwavering commitment to innovation, customer success, and delivering enterprise-grade Desktop as a Service solutions that empower organizations to securely leverage AI and other business-critical technologies from anywhere. We are grateful to our customers and partners whose trust continues to drive our success.”

Organizations are rethinking the role of DaaS as they modernize IT, accelerate AI adoption, and strengthen [cybersecurity](#). With the total cost of ownership of DaaS now comparable to

traditional PCs when lifecycle, deployment, repair, and downtime costs are considered, organizations are increasingly viewing DaaS as a strategic platform rather than simply an end-user computing solution. Beyond supporting today's hybrid workforce, organizations are using virtual desktops to provision secure environments for AI agents and autonomous workflows, rapidly onboard employees despite ongoing hardware supply constraints, and improve the digital employee experience through AI-driven IT automation. Built on centralized security and compliance, DaaS also enables IT teams to deploy patches, respond to emerging threats, and restore users to trusted environments in minutes, helping organizations reduce endpoint risk while maintaining operational resilience.

Gartner, Magic Quadrant for Desktop as a Service, 5 August 2026.

About IronOrbit

IronOrbit is a leading provider of enterprise-grade, AI-ready Desktop as a Service (DaaS), secure cloud infrastructure, and managed IT solutions built with cybersecurity and compliance at their core. Backed by more than 28 years of experience and seven consecutive years of SOC 2 Type II compliance with no exceptions, IronOrbit helps organizations, especially those in regulated industries, modernize IT and strengthen their security posture. IronOrbit recently joined Shield Technology Partners to accelerate its AI capabilities, drawing on Shield's relationship with Thrive Holdings, which partnered with OpenAI to bring frontier AI to IT services and other workflow-heavy sectors.
