

4CE Engineering Group Announces Strategic Partnership with Mohsen Design Group

Expanding Platform into Aviation Infrastructure and Engineering Services

TAMPA, FL, UNITED STATES, August 13, 2026 /EINPresswire.com/ -- [4CE](#) Engineering Group ("4CE"), a growing network of engineering and infrastructure firms dedicated to connecting engineers, contractors, manufacturers, and asset owners, today announced a strategic partnership with Mohsen Design Group ([MDG](#)), a Tampa-based engineering firm specializing in aviation, transportation, utility, and civil infrastructure projects.

The partnership marks 4CE's expansion into the aviation infrastructure market while significantly broadening the capabilities available to customers across the Southeast. Together, the organizations will provide a more comprehensive suite of services spanning airport development, utility design, drainage, transportation, surveying, subsurface utility engineering, lighting, and site civil engineering.

For 4CE Founder and CEO, Wes Kingery, and Mohsen Design Group Founder and CEO, Mohsen Mohammadi, the announcement represents the next chapter in a professional relationship that has spanned more than twenty years.

Long before becoming partners, Wes and Mohsen worked together on airport, transportation, and infrastructure projects throughout Florida and the Southeast, collaborating as contractors, consultants, and trusted advisors. Their shared commitment to customer service, technical excellence, and doing what's right for clients ultimately laid the foundation for today's partnership.

"This partnership wasn't built in a boardroom, it was built over decades of working together and earning each other's trust project after project," said Wes Kingery, Founder and CEO of 4CE Engineering Group. "Mohsen and his team have built an exceptional reputation in the aviation and infrastructure markets by putting customers first, delivering quality work, and always doing the right thing. Those values align perfectly with what we're building at 4CE."

"By bringing our organizations together, we're not changing how we do business, we're enhancing our capabilities collectively to better serve our customers."

Founded in Tampa, Mohsen Design Group has established itself as a trusted partner to airport

authorities, transportation agencies, municipalities, and private developers, delivering expertise across airport planning and development, utility coordination, drainage design, roadway engineering, and civil infrastructure projects.

"For more than twenty years, Wes and I have worked side by side on projects that demanded trust, responsiveness, and a relentless focus on our clients," said Mohsen Mohammadi, Founder and CEO of Mohsen Design Group. "What made this partnership exciting wasn't simply the opportunity to grow, it's the fact that we've always shared the same philosophy: take care of the customer, deliver quality work, and stand behind what you build."

"Our customers trust us because of our people and our commitment to service. That commitment isn't changing. Through this partnership, we'll be able to offer even greater capabilities while continuing to deliver the responsiveness and quality our clients expect."

The partnership immediately expands the services available to customers of both organizations.

Customers will now have access to:

- Aviation planning and airport infrastructure development
- Runway, taxiway, and airfield engineering
- Utility design and utility coordination
- Drainage and stormwater engineering
- Transportation and roadway engineering
- Survey and mapping services
- Subsurface Utility Engineering (SUE)
- Site civil engineering
- Lighting, signing, and pavement marking design

The partnership represents another milestone in 4CE's vision of building a connected engineering platform capable of delivering comprehensive infrastructure solutions across transportation, aviation, utilities, and civil markets.

About 4CE Engineering Group

4CE is an engineering growth platform designed to partner with select civil infrastructure firms to bring about meaningful, sustainable progress. With deep industry roots, 4CE empowers firms to scale smartly, serve better, and remain true to their mission. www.4ceeng.com and on [LinkedIn](#).
