

MailRoute Opens Migration Path Ahead of Securence Shutdown

Businesses using Securence for email filtering or hosted mailboxes have a hard deadline. MailRoute replaces both.

LOS ANGELES, CA, UNITED STATES, August 13, 2026 /EINPresswire.com/ -- Businesses using [Securence](#) for email filtering or hosted mailboxes have a hard deadline. [MailRoute](#) replaces both.

US Internet has notified Securence customers, including MSP's, that it is retiring all Securence services on November 11, 2026, via its Securence migration FAQ.

That shutdown covers both halves of what Securence provided: inbound email filtering and hosted POP/IMAP mailboxes. Customers on either service need a new provider in place before that date, or their mail stops moving.

MailRoute has provided hosted email filtering since 2003. The company replaces both pieces of the Securence service: the filter that sits in front of a mail server, and the hosted mailboxes for customers who had Securence hosting their email directly.

MailRoute says no payment until Nov 11 for Securence customers

For organizations that use Securence to filter Microsoft 365 or Google Workspace rather than a self-hosted mail server, the migration is the same in practice — a single MX record change, with nothing else in the mail environment affected.

“

The greatest risk in this forced migration is running out of time to set up a replacement”

TA Johnson, CEO

"This is a forced migration with a fixed deadline, not a decision customers get to defer," MailRoute CEO TA Johnson said. "The technical work is small. The risk is running out of time to do it."

To remove the cost of overlapping during the transition, MailRoute will not bill former Securence customers until November 11, 2026 — the date Securence service ends. Customers switching before then are not paying two vendors for the same coverage.

Full migration details are available at <https://mailroute.net/compare/securence-alternative>.

MSP's who join MailRoute's reseller partnership program enjoy deep discounts and added features.

Contact info@mailroute.net to schedule demos and sales meetings for MSP's and customers.

About MailRoute

MailRoute has provided email filtering since 2003 as well as hosted mail, protecting inbound and outbound mail for organizations running their own mail servers as well as those on Microsoft 365 and Google Workspace.
