

OnPage Recognized in the Gartner® Hype Cycle™ for Digital Care Delivery, 2026

OnPage views its inclusion in the CC&C category as highlighting the importance of secure communication in improving care coordination & clinical response

WALTHAM, MA, UNITED STATES, August 13, 2026 /EINPresswire.com/ -- [OnPage Corporation](#), a provider of an advanced, secure critical communication and collaboration platform that ensures urgent alerts are never missed, today announced its inclusion in the [Gartner® Hype Cycle™ for Digital Care Delivery](#), 2026, published on June 18, 2026.

OnPage's Clinical Communication and Collaboration system helps healthcare teams manage secure messaging, on-call schedules and critical alerts from a unified platform.

OnPage was recognized as a Sample Vendor in the [Clinical Communication and Collaboration \(CC&C\) category](#). According to Gartner, "CC&C systems are mobile platforms that clinicians, care teams, patients and caregivers use to collaborate on treatment and care activity within ambulatory, acute, postacute and virtual care settings. CC&C systems improve situational

“

Our platform helps care teams reach the right clinician at the right time, reduce communication delays and keep urgent patient needs from getting lost in notification noise.”

Judit Sharon, CEO of OnPage

awareness surrounding the patient and information sharing at the point of care and during care transitions.” Gartner rates the category’s benefit as “High,” its maturity as “Mature mainstream” and its market penetration at more than 50% of the target audience.

“In healthcare, every second matters, and a missed message or delayed critical clinical alert can affect care coordination, clinician efficiency and patient safety,” said Judit Sharon, founder and CEO of OnPage. “We believe OnPage’s inclusion in this Gartner Hype Cycle underscores

the importance of combining secure healthcare messaging, persistent alerting, on-call schedule-aware routing and escalation with HIPAA-compliant clinical communication. Our platform helps care teams reach the right clinician at the right time, reduce communication delays and keep

urgent patient needs from getting lost in notification noise.”

The Gartner report notes that “clinical communication and collaboration solutions facilitate collaboration among physicians, nurses, allied health professionals and support staff. CC&C increasingly including patients, caregivers and family members in the care team, making it a viable tool for patient/provider engagement and, in some cases, virtual care. CC&C positively impacts patient safety, care-team efficiency and effectiveness, nursing productivity, care coordination and patient throughput challenges.” The report also notes that CC&C systems can help teams access critical patient results, collaborate in real time, engage patients and caregivers, reduce care-team toil and improve patient safety and care quality.

OnPage’s HIPAA-compliant messaging and clinical communication platform helps hospitals, health systems, clinics and postacute care organizations coordinate time-sensitive care through secure healthcare messaging platform, hospital messaging, critical clinical alerts and call routing. The platform can route alerts based on role, groups, schedule, location or escalation policy, helping healthcare organizations rapidly engage the appropriate physician, nurse or care-team member. Persistent Alert-Until-Read notifications and acknowledgment tracking provide visibility into whether an urgent message has been received and acted upon.

OnPage integrates with EHRs, nurse call systems, laboratory systems, medical devices, monitoring tools, answering services, contact center software, and other clinical technologies to convert actionable events into secure, prioritized mobile alerts. High-priority notifications can bypass device silent mode and Do Not Disturb settings, while automated escalations help prevent unacknowledged alerts from stalling care. By combining secure team collaboration, role-based routing, real-time audit trails and fail-safe escalation, OnPage helps healthcare organizations streamline clinical workflows, reduce alarm and notification fatigue, accelerate response times and support safer, more coordinated care.
