Global Clean Energy, Inc. (GCEI) Reports Accelerating AI Sales Momentum and Expanding Strategic Pipeline

New client wins, rising contract values, and high-profile partnership discussions underscore growing demand for GCEI’s AI services and Fractional CAIO solutions

HOUSTON, TX, UNITED STATES, August 13, 2026 /EINPresswire.com/ -- Global Clean Energy, Inc. (OTCID: GCEI), a leader in sustainable energy and innovation, today announced continued momentum across its AI division, marked by new client onboarding, significant contract expansions and advancing discussions with governments, major financial and technology institutions. The Company’s diversified pipeline and increasing average contract values reflect strong market validation for its AI-enabled services and Fractional Chief AI Officer (CAIO) offerings.

Sales and Client Growth
GCEI has onboarded multiple new clients across professional services, legal, drone operations, and business development sectors in recent weeks. The Company also reports a more than 160% increase in average monthly contract value for its Fractional CAIO services, reflecting heightened demand for enterprise-grade AI leadership at a flexible engagement model.

New engagements include a six-figure annual agreement with a legal services firm and an in-principle commitment for a $150K annual contract with a business-development partner, both signed within the past week. Additional client expansions are in final negotiation, with several expected to close before month-end.

“Our accelerating client wins, rising contract values, and high-profile partnership discussions validate our AI strategy and position GCEI for sustained, scalable growth, said Greg Godbout, Chief Innovation Officer.”

Strategic Partnerships and Pipeline Development
GCEI’s AI capabilities are attracting interest from prominent institutions. The Company has initiated discussions with a leading global technology and cloud-computing provider to explore a capabilities-partner role supporting their federal business, with an introductory meeting scheduled for mid-August. Separately, GCEI is engaged in strategic conversations with a premier financial data and media company and a top-tier global investment bank regarding AI-driven initiatives, with a follow-up discussion set for next week.

The Company’s Procurement Acquisition Engine (PAE) prototype is advancing through engagement with domain experts, with a view toward internal commercialization and government contracting opportunities under its GSA vehicle.

Government and Institutional Engagements
GCEI continues to support key U.S. federal finance and revenue agencies through AI-enabled recruiting and candidate-sourcing initiatives. The Company is also engaged in disaster-management AI work under the AIDE initiative, a Markel-funded project, and has been invited to a private industry partners meeting in Texas this September.

About Global Clean Energy, Inc.
Global Clean Energy, Inc. (OTCID: GCEI) drives the transition to sustainable infrastructure through innovative AI, energy solutions, and resilience technologies. The Company is building a diversified platform designed to serve the growing need for smarter energy decisions, infrastructure reliability, and applied intelligence across commercial and public-sector markets.
