

Adjusto Launches AI-Native Contents Claims Services Powered by Its Technology Platform

Adjusto Remote gives carriers access to more than 500+ field and desk adjusters across the U.S., supported by the same tech available to carrier claims teams.

BOULDER, CO, UNITED STATES, August 13, 2026 /EINPresswire.com/ -- [Adjusto](#)

today announced the launch of Adjusto Remote, an AI-native contents claims service providing field inventory and desk adjusting across the 48 continental United States.

The service gives carriers another option for outsourced contents claims, particularly those that already rely on TPAs for field inventory, desk valuation or full contents assignments.

“

We have to break free from simply using tech to optimize the same process. We should be asking where tech can give adjusters new capabilities. Our new tooling augments desk and field adjusters.”

Michael Balarezo, CEO and cofounder, Adjusto

Adjusto Remote combines more than 500+ field and desk adjusters with Adjusto’s technology for inventory capture, documentation and FairMatch™ valuation for settlement.

“We kept hearing the same question from carriers: ‘We love the platform. Can you help us with field inventory and desk adjusting, too?’” said [Michael Balarezo](#), CEO and co-founder of Adjusto. “They want experienced people who can get the work done quickly and accurately, while still protecting the relationship they have with their

policyholders.”

What Adjusto Remote provides

- Field inventory and desk adjusting across the continental U.S.
- A network of more than 500+ adjusters
- AI-assisted video inventory and FairMatch™ valuation
- Faster turnaround and greater visibility into the contents process
- Carrier access to the same technology Adjusto uses for accurate and accelerated claims outcomes

That technology component is uncommon in the TPA market, where the systems used to perform outsourced claims work are often kept behind the scenes.

In a recent 11-room total-loss contents assignment, a single adjuster recorded approximately two hours and 40 minutes of video covering 1,765 inventory items. Adjusto's platform processed the documentation and produced valuation recommendations in approximately seven minutes.

Balarezo said the broader opportunity is to rethink how technology supports adjusters and policyholders. "We have to break free from simply using technology to optimize the same process," he said. "You'll eventually hit a limit. We should be asking where technology can give adjusters new capabilities, and this can require us to rethink how the work was originally done. Our new tooling augments desk and field adjusters with AI to improve their experience, as well as the policyholders'."

Adjusto Remote is now available for field inventory and desk adjusting assignments throughout the continental United States. For more information, visit www.adjusto.ai or contact brett@coversecomms.com.

About Adjusto

Adjusto provides contents claims technology and services designed to improve outcomes for carriers and policyholders. Its platform supports automated inventory capture, documentation and FairMatch™ valuation, while Adjusto Remote provides specialized field and desk adjusting resources using the Adjusto platform across the continental United States.
