

# Nature Provides Film on Plant Stem Cell Science Wins Best Documentary at Dreamz Catcher International Film Festival

*Episode 2, Exploring the Science of Embryonic Plant Stem Cells, Earns Its First Wave of International Recognition for Jennifer and Louis Payeur.*

CHARLOTTE, NC, UNITED STATES, August 13, 2026 /EINPresswire.com/ -- [Nature Provides: Exploring the Science of Embryonic Plant Stem Cells](#), the second installment in Jennifer O'Brien Payeur's award-winning documentary series, has won five honors at the Dreamz Catcher International Film Festival (DCIFF), one of the largest independent showcases on the international festival circuit. The film took home Best Documentary Film, Best Nature/Environment/Wildlife Project, and Best Wellness/Fitness Video, while Payeur was named Best Director and Mary Agnes Antonopoulos, the film's producer, was named Best Producer.

“

For years I told my own story because that's what people connect to first. But behind that story is decades of real science, and this film finally gives it the spotlight it deserves.”

*Jennifer O'Brien Payeur,  
Founder of Nature Provides*

Best Documentary Laurel for Nature Provides Episode 2

The recognition marks the first competitive wins for Episode 2 of the series, which shifts the lens from the personal story that anchored Episode 1 to the science itself.

The film examines the clinical and biochemical foundations of Gemmotherapy, the century-old European practice of using concentrated embryonic plant stem cells for healing, and features Dr. Antonio Salerno, Manager of Quality Control, and Dr. Joseph Cannillo, DC, PhD, Founder of Forza Vitale Laboratory and one of the field's leading researchers, alongside physicians from around the world, including Dr. Michael Karlfeldt, ND, Ph.D; Karen Gadol, PA-

C, CLT; Deborah Manke, ANP-BC, IFMCP; who use the therapy in their own practices. Cameras follow the harvest and extraction process at the source in Italy, tracing how a raw plant bud becomes a clinical remedy. "For years I told my own story because that's what people connect to first. But behind that story is decades of real science, and this film finally gives it the spotlight it deserves. Gemmotherapy isn't folklore. It's biochemistry, it's clinical practice, it's Dr. Cannillo and physicians around the world using this every day on their patients. I wanted people to see the research, not just my recovery." ~ Jennifer O'Brien Payeur, director of the film and founder of Nature Provides.

The 5-award sweep builds on the momentum of Episode 1, Nature Provides: The Ancient Wisdom of Plant Stem Cells, which won Best Feature Documentary at the Alpine International Film Festival in Bern, Switzerland, and has continued to collect laurels on the festival circuit since its release. With Episode 2 now earning its own recognition, the series has established Payeur and Antonopoulos as a filmmaking team whose work is resonating with both audiences and juries across two distinct chapters of the same story. Nature Provides: Exploring the Science of Embryonic Plant Stem Cells is currently on the international festival circuit. Full award/nomination history is available upon request.

About Jennifer O'Brien Payeur

Jenn Payeur is a holistic health innovator, leading expert in concentrated embryonic plant stem cell remedies, and founder of Nature Provides and the Divine Health Alliance wellness clinic in Weddington, NC. A stage-4 breast cancer thriver, she dedicated her life to educating others on
