

Drummond Certifies Six AS4 Products in 2026 Test Event

DURHAM, NC, UNITED STATES, August 13, 2026 /EINPresswire.com/ -- Drummond Group, LLC, the trusted provider of interoperability and security testing for B2B and B2G software, announced today the successful completion of its 2026 AS4 interoperability test event. Six products across four vendors demonstrated conformance with AS4 specifications: Axway, CData Software, Cleo, and IBM Corporation.

Drummond's AS4 testing evaluates conformance with the AS4 specification across a comprehensive test matrix. Products tested included Axway B2Bi 2.6 and Activator 6.1, CData Arc 26.3.9678.0, Cleo Integration Cloud (Cleo LexiCom, Cleo VLTrader, and Cleo Harmony version 6.0), IBM DataPower Gateway V11.0, IBM webMethods B2B module for AS4 10.1, and IBM webMethods B2B SaaS 11.2.80. All products successfully tested over both HTTP and HTTPS connections, demonstrating interoperability across communication protocols.

Drummond's test methodology incorporates InSitu, a proprietary full-matrix framework that automates test case execution while reducing the coordination burden on participants. This approach allows vendors to concentrate on debugging their implementations rather than managing test logistics. Participants new to the program receive comprehensive technical support from Drummond throughout the pre-certification phase, ensuring products meet InSitu requirements before formal testing begins.

The certification process builds on proven regression testing methodology. Each test event executes multiple automated cases against live implementations, uncovering interoperability issues before products reach production. This approach protects vendors' customers by confirming that certified products work reliably across AS4 deployments.

"AS4 conformance across these six products demonstrates real interoperability at scale," said Patrick Paschall, Director, Information Security & Interoperability Services at Drummond. "When

vendors successfully test against this breadth of implementations, buyers gain confidence that AS4 will work reliably in their environment. That confidence matters as adoption accelerates globally."

The complete AS4 Final Report, the full list of newly certified products, and test registration information are available on the Drummond website at

About AS4

AS4, an OASIS B2B messaging standard, was finalized by the OASIS ebXML Messaging Services (ebMS) Technical Committee. The intent and purpose of the development of AS4 was to define a simplified Conformance Profile of the ebMS v3.0 specification that would serve as a B2B on-ramp for Web Services document exchange.

About Drummond Group, LLC

For over 25 years, Drummond has been a trusted leader in compliance testing and certification. Founded on B2B supply chain interoperability testing, Drummond is now a trusted leader in ONC Health IT and EPCS testing and certification, with global expertise spanning compliance, FHIR interoperability, and cybersecurity for highly regulated sectors including healthcare, finance, and supply chain. Drummond provides expert testing, certification, compliance audits, security assessments, and advisory services for critical standards and regulations, including HIPAA, MARS-E, FDA CFR 21 Part 11, PCI DSS, FTC Safeguards, AS2/AS4 and more. Our comprehensive cybersecurity solutions help organizations identify vulnerabilities, reduce risks, and maintain secure, compliant operations, empowering them to deliver trusted systems and services.
