

Paramount Roofing Adds Attic Armor Service To Protect Metro Detroit Homes

The Local Roofing Contractor Now Installs Attic Armor To Block Bees, Bats And Other Non-Chewing Pests From Entering Homes Through The Attic.

DETROIT, MI, UNITED STATES, August 13, 2026 /EINPresswire.com/ -- DETROIT, Aug. 14, 2026—[Paramount Roofing](#) is now offering Attic Armor, a pest-barrier service designed to prevent bees, bats and other non-chewing pests from entering a home's attic through the roof ridge. The barrier sits at the ridge line, closing off the gap that pests most commonly exploit to access attic spaces.

"Attic Armor gives our customers a practical layer of protection they didn't have before. Pests that get into the attic through the ridge can cause real damage, and this service addresses that problem at the source," said Eric Reno, President of Paramount Roofing.

Homeowners who are having issues with pests entering their home through the roof can benefit from adding this service while scheduling roof replacement or repair work with Paramount Roofing across Metro Detroit. Because Attic Armor is installed with the synthetic underlayment already used in the company's roofing projects, adding the barrier requires no separate mobilization. Homeowners interested in Attic Armor can learn more about Paramount Roofing or review the company's [attic insulation services](#).
