

Garrison Flood Control Ranks No. 63 on 2026 Inc. 5000 list, No. 2 Among U.S. Manufacturers

Florida-based flood barrier manufacturer ranks No. 8 among all Florida companies as demand grows for engineered flood protection and flood mitigation systems.

POMPANO BEACH, FL, UNITED STATES, August 13, 2026 /EINPresswire.com/ -- [Garrison Flood Control](#), a U.S. manufacturer and provider of engineered flood barrier and flood protection systems, has been named No. 63 on the 2026 Inc. 5000 list of America's fastest-growing private companies.

Garrison Flood Control Team at Pompano Beach, FL

Garrison also ranked No. 2 among manufacturing companies nationwide and No. 8 among all companies in Florida.

“

Being ranked on the Inc. 5000 is an incredible recognition of what we have built together. I'm extremely proud of our team, continued product innovation and the trust our customers place in Garrison.”

Arnon Rosan

The recognition comes as businesses, homeowners, municipalities, utilities and government agencies increasingly seek ways to protect properties and critical infrastructure from hurricanes, storm surge, extreme rainfall, flash flooding and other flood risks.

“Being ranked on the Inc. 5000 is an incredible recognition of what our entire team has built together,” said Arnon Rosan, President and CEO of Garrison Flood Control. “What makes it especially meaningful is what that growth represents. Every project is another opportunity to help a

homeowner, business, municipality or government agency become better prepared for flooding. I'm extremely proud of our team, our continued product innovation and the trust our customers place in Garrison.”

More Than 5,000 Flood Mitigation Projects Nationwide

Garrison Flood Control has completed more than 5,000 flood mitigation projects nationwide, serving customers ranging from individual homeowners to commercial facilities, municipalities, government agencies, utilities and critical infrastructure operators.

The company manufactures flood protection systems in Florida and provides site evaluation, engineering, installation and testing capabilities for projects ranging from individual building openings to large-scale perimeter flood protection.

Garrison's flood protection portfolio includes [aluminum flood logs](#), removable flood panels, [modular perimeter flood barriers](#), inflatable flood barriers, temporary flood barriers and water-diversion systems.

Products include the Hammerhead® Aluminum Flood Log, MAKO® Inflatable Flood Barrier, YellowFIN™ Flood Panel, BlueFIN™ Perimeter Flood Barrier and Mayim® Flood Barrier.

Garrison conducts engineering, water-tank testing and product development to evaluate factors including leakage, hydrostatic pressure and debris-impact resistance.

The company also maintains established purchasing contracts, including cooperative purchasing agreements through Sourcwell and TIPS, as well as government contracts including Pinellas County, Florida, and the Government of Canada.

Growth in Flood Protection and Resilience

Garrison's growth reflects a broader need for practical flood resilience as properties face

exposure from hurricanes, tropical storms, storm surge, riverine flooding, extreme rainfall and other flood events.

Unlike providers focused on a single type of flood barrier, Garrison develops multiple flood protection technologies for different applications—from residential doorways and garages to commercial facilities, power plants, water and wastewater infrastructure, municipal facilities and large perimeter applications.

“Flood protection is not one-size-fits-all,” Rosan said. “Our goal is to give customers access to the right engineered solution for their specific property and flood risk, and to make that protection practical to deploy before the water arrives.”

Garrison continues to invest in U.S. manufacturing, engineering, product development, testing and installation capacity as it expands its flood protection operations nationally and internationally.

About Garrison Flood Control

Garrison Flood Control is a U.S.-based manufacturer, installer and provider of engineered flood barriers and flood mitigation systems for residential, commercial, municipal, government and infrastructure applications. It is one of the largest providers of flood barriers in the United States. The company offers permanent, removable and temporary flood protection solutions, including aluminum flood logs, flood panels, inflatable barriers, modular perimeter barriers and water-diversion systems.

Garrison manufactures flood protection products in Florida and has completed more than 5,000 flood mitigation projects nationwide.

Garrison Flood Controls 2026 Inc. 5000 Fastest Growing Companies Rankings:

No. 63 — United States

No. 2 — U.S. Manufacturing

No. 8 — Florida
