

CitroTech and Global Fireproof Solutions Partner to Expand Non-Toxic Fire Protection Across the Southeast

GFS joins CitroTech's 20+ certified partners, opening new applications for high-value equine and livestock protection and fire solutions for rural communities

OCEANSIDE, CA, UNITED STATES, August 13, 2026 /EINPresswire.com/ --

[CitroTech](#) (NYSE AM: CITR), a specialty chemical company developing environmentally responsible fire-retardant solutions, and Global Fireproof Solutions (GFS), a leader in fire protection treatments and code-compliant fire performance solutions,

today announced a strategic partnership to integrate CitroTech's non-toxic fire inhibitor across GFS's current businesses, bringing the technology to a broader range of geographies, customers and applications.

CitroTech and Global Fireproof Solutions partner to expand environmentally responsible fire-retardant technology into agricultural, equine, and rural markets.

“

CitroTech's non-toxic inhibitor extends GFS's commitment to technical expertise into the farms, barns, equine facilities, and outdoor structures that rural and agricultural communities depend on.”

Kevin Schaff, Global Head of Business Development at CitroTech

GFS specializes in fire-retardant treatments for wood products and specialty materials serving customers across the Southeast and supporting projects nationwide. Through this partnership, GFS will integrate CitroTech's inhibitor into its treatment capabilities and pursue new applications for farms, equine facilities, livestock operations, outdoor structures and other environments where effective fire protection is critical to protecting people, animals and property.

“For decades, GFS has built a reputation for innovation in fire protection treatments and code-compliant fire performance,” said Kevin Schaff, Global Head of Business Development at CitroTech. “CitroTech's non-toxic inhibitor extends GFS's commitment to technical expertise into the farms, barns, equine facilities and outdoor structures that rural and agricultural communities depend on.”

CitroTech's inhibitor is the only long-term fire retardant recognized under the U.S. Environmental Protection Agency's Safer Choice program and the first to meet its Clean Water Act standards. It is UL GREENGUARD Gold certified and has passed ASTM E84 Extended testing. Unlike pressure-treated lumber, which relies on chemicals such as borates that can weaken wood fibers, CitroTech's citric acid-derived formulation is engineered to penetrate at the molecular level, helping prevent ignition without compromising strength or performance. This gives agricultural and rural communities effective fire protection without adverse impacts to land, structures or animals.

“At Global Fireproof Solutions, our mission has always been protecting people, structures and communities through advanced fire protection systems,” said Chris Birchfield, CEO of Global Fireproof Solutions. “CitroTech's EPA Safer Choice-recognized formulation is a biodegradable, heavy-metal-free alternative to legacy fire-retardant chemistries, a technology we're proud to bring to agricultural, equestrian and outdoor environments where high-performance fire protection is increasingly important.”

GFS has completed CitroTech's certified partner training program, including hands-on test spraying of the product. The partnership reflects the growing trust industry leaders place in CitroTech, as demand rises for non-toxic, high-performance alternatives to conventional fire-retardant chemistries across residential, agricultural and building materials markets.

CitroTech continues to attract leading Certified Partners across the United States that want to deploy environmentally friendly fire protection solutions. Partnerships like the one formed with Global Fireproof Solutions create opportunities to expand to new applications while CitroTech
