

Advintek Named OTA Approved ASP in Oman: The Best eInvoicing Platform for Fawtara

Advintek subsidiary Al Faisal secures OTA ASP status, empowering Oman businesses to achieve Fawtara Phase 1 compliance with automated e-invoicing.

MUSCAT, OMAN, OMAN, August 15, 2026 /EINPresswire.com/ -- Advintek Global, a leading provider of e-invoicing, invoice automation, and ERP-integrated compliance solutions, today announced its subsidiary Al Faisal Business and Services LLC has been named an Approved Authorized Service Provider (ASP) by the Oman Tax Authority (OTA), marking a major milestone in the company's commitment to supporting businesses through Oman's Fawtara e-invoicing transformation.

As an [OTA approved ASP](#), Advintek strengthens its role as a trusted technology partner for organizations preparing for Fawtara, the nation's e-invoicing mandate. With deep expertise across ERP integrations, invoice validation workflows, automation systems, and compliance monitoring, Advintek is positioned to help companies simplify the transition from traditional invoicing to structured, fully compliant e-invoicing ahead of Fawtara Phase 1.

“

This Approved status is a key milestone for Advintek in Oman. With global expertise in 50+ countries, we help Omani organizations build automated, future-ready e-invoicing ahead of Phase 1.”

*Mr Surya Prakash, CEO,
Advintek*

As businesses across Oman prepare for Fawtara Phase 1, set to take effect in April 2027, Advintek's Approved status reflects its readiness to deliver secure, scalable, and implementation-focused electronic invoicing solutions for enterprises, mid-market companies, and growing

businesses across the Sultanate.

Oman's move toward Fawtara e-invoicing is expected to reshape how businesses generate, exchange, validate, and manage invoices. For finance, tax, ERP, and compliance teams, this shift requires more than software installation. It demands structured implementation, system readiness, data accuracy, workflow alignment, and long-term operational control, with time now limited before Phase 1 goes live in April 2027.

Advintek's Fawtara solution simplifies [Oman e invoicing](#) implementation through seamless ERP integration, automated workflows, real-time validation support, and audit-ready reporting. By minimizing manual processing and enhancing process accuracy, the platform helps finance teams strengthen VAT compliance and achieve complete operational readiness well before Phase 1.

"Omani businesses need more than an e invoice system. They need a partner that understands ERP environments, compliance workflows, finance operations, and implementation realities, Our Approved status reinforces our ability to support organizations through every stage of their Fawtara journey, from readiness assessment to integration, testing, rollout, and ongoing support, with Phase 1 now fast approaching." said Mr Sathish Jegadessan, Global E-Invoice SME, Advintek.

Advintek's invoice automation approach focuses on making Fawtara adoption practical for businesses operating across different systems and industries. The company supports integrations with leading ERP and accounting platforms including SAP, Oracle, QuickBooks, Xero, Zoho Books, MYOB, and Sage, helping organizations connect existing invoice processes with compliant digital workflows without unnecessary disruption.

The Approved status also comes at a critical time for businesses that are beginning to evaluate their internal e-invoicing readiness ahead of Fawtara Phase 1 in April 2027. Many organizations are reviewing data structures, ERP configurations, electronic invoice formats, tax logic, approval workflows, invoice processing procedures, archiving processes, and exception-handling mechanisms to prepare for the upcoming requirements. Advintek's invoice automation software aims to help these businesses move beyond uncertainty and build a clear, phased implementation roadmap before the deadline arrives.

With Approved OTA ASP status now in place, Advintek will continue expanding its Oman e-invoicing capabilities, industry-specific implementation support, and advisory-led engagement model. The company plans to work closely with finance leaders, tax teams, technology heads, and business owners across Oman to simplify Fawtara adoption and ensure organizations are prepared for the operational and technical demands of electronic invoicing before Phase 1 takes effect.

The announcement reinforces Advintek's broader mission to help businesses modernize financial operations through invoice automation, compliance intelligence, and trusted digital infrastructure.

About Advintek Global

Advintek Global is a e-Invoicing Specialist providing e-invoicing, invoice automation, and ERP integration services across 50+ countries. Trusted by 3,000+ clients across 70+ industries, Advintek helps businesses prepare for digital tax compliance, automate invoice operations, and connect existing finance systems with structured, compliant e-invoicing workflows, including readiness for Oman's Fawtara Phase 1.

With 10+ years of industry experience, CMMI Level 3 maturity, and ISO 27001:2022 certification, Advintek combines compliance expertise, enterprise-grade security, and deep system integration capabilities. The company supports organizations across healthcare, logistics, technology, manufacturing, retail, and other major sectors with secure, scalable, and implementation-ready digital finance solutions.

Positioned as the [best invoicing platform](#) for seamless system integration, Advintek works with leading ERP and accounting software—including SAP, Oracle, QuickBooks, Xero, Zoho Books, MYOB, and Sage. This enables businesses to modernize invoice workflows, improve data accuracy, strengthen audit readiness, and manage Fawtara e-invoicing implementation with greater control and confidence.
