

MSN Features Kuvings AUTO10 Plus for Busy Back-to-School Routines

With families returning to structured school schedules, MSN recently looked at ways to make fresh juice part of busy morning routines.

IL, UNITED STATES, August 15, 2026 /EINPresswire.com/ -- With families returning to structured school schedules, MSN recently looked at ways to make fresh juice part of busy morning routines. Published August 5, the feature "[Back-to-school mornings just got easier with this hands-free juicer](#)" highlighted the Kuvings [AUTO10 Plus](#) Hands-Free Slow Juicer as a fit for hectic school-year mornings.

A Hands-Free Approach to Morning Juicing

The article noted that preparing fresh juice can become difficult to maintain during busy mornings when traditional juicers require ingredients to be added one piece at a time. In this context, the feature explored how a hands-free design can reduce some of the attention required during the juicing process.

Designed for Larger Batches

MSN highlighted the appliance's large-capacity 135-ounce hopper, which lets users add ingredients in one go instead of continuously feeding them piece by piece. This streamlined approach was noted as especially helpful for households preparing larger quantities of juice or multiple servings in a single preparation cycle.

Cold-Press Technology

MSN also introduced the cold-press masticating technology used by the Kuvings AUTO10 Plus. Rather than relying on high-speed spinning, the technology extracts juice through a slower

Kuvings AUTO10 Plus: Built for Busy Back-to-School Mornings

pressing process, a characteristic associated with cold-press juicing.

Through its back-to-school lens, the MSN feature presented the AUTO10 Plus as an example of how kitchen appliances can be incorporated into busy daily routines while supporting homemade juice and other fresh preparations. The coverage highlights the growing role of convenience and versatility in helping families maintain fresh food and beverage habits throughout the school year.
