

ePac Flexible Packaging Celebrates 10 Years of Transforming the Packaging Industry

ePac Flexible Packaging Celebrates a Decade of Packaging Made Simple

DEL MAR, CA, UNITED STATES, August 20, 2026 /EINPresswire.com/ -- ePac Flexible Packaging, a global leader in digitally printed flexible packaging, proudly celebrates its 10th anniversary. Over the past decade, the company has revolutionized how brands of all sizes scale by delivering faster turnaround times, sustainable materials, and supply chain flexibility.

Founded in 2016 with a vision to empower local and regional CPG brands to compete with national giants, ePac has scaled from a single manufacturing facility into a global network serving thousands of customers across North America, Europe, Africa, and the Asia-Pacific region.

ePac delivers dynamic flexible packaging solutions built for every stage of growth. By bridging the gap between low-minimum order agility and high-volume production capacity, ePac empowers brands to launch quickly, pivot seamlessly for seasonal demands, and scale into full-scale national distribution without compromising speed or print quality.

A Culture Centered on People and Purpose

ePac's global growth stems from a collaborative culture dedicated to challenging traditional manufacturing models.

"From our early startup days, everyone here has pulled together to build what ePac is today," said team member Max Prichard. "That spirit drives us to disrupt the market, lead industry

trends, and put our customers first. I'm grateful for every milestone, challenge, and teammate along the way."

Reflecting on the decade, ePac team member Russell Stogbauer added:

"My favorite part of these ten years has been working alongside so many passionate people. Every package we produce represents someone's dream, and it's a privilege to play a part in their success."

Engineered for the Future

By leveraging advanced print technology, ePac enables brands to order strictly on demand, dramatically reducing obsolete inventory, minimizing landfill waste, and streamlining supply chains. Its proprietary global network, ePacONE (One Network Everywhere), allows orders of any scale to be routed seamlessly across 20+ facilities worldwide.

"From day one, ePac was built to empower brands at every level," said Virag Patel, CEO and Co-Founder of ePac Flexible Packaging. "Whether providing low-minimum agility for a startup's flagship launch or high-capacity production for a global enterprise's national rollout, we remove manufacturing constraints so our partners can focus on scaling their business."

As ePac enters its second decade, it is accelerating investments in high-barrier materials, sustainable film options, expanded production capacity, and next-generation digital technology.

"Our best years are ahead of us," Patel added. "As we enter our second decade, we are doubling down on next generation print technology that allows us to seamlessly scale alongside our brands, whether they need hyper local runs or massive national distribution. We are leveraging technology to simplify the entire packaging process, while keeping the fast response times and personal, hands-on touch that our community-based brands have relied on since day one."

About ePac Flexible Packaging

ePac Flexible Packaging is a global leader in digital flexible packaging, delivering high-quality, custom packaging with low minimums, fast turnaround times, and sustainable material options. Founded in 2016, ePac began with a single plant in Madison, Wisconsin, with manufacturing facilities across the United States, Canada, Europe, and beyond, ePac helps brands bring products to market faster and adapt quickly to changing consumer demand. Today, through its proprietary technology platform - ePacONE (One Network Everywhere), ePac provides brands of all sizes the ability to produce any size order in any of its 20+ facilities across the globe.

ePac offers a full complement of sustainable film options, while its print technology platform is carbon-neutral and inherently eco-friendly. Further, the company offers true order-to-demand capability, helping brands reduce inventory and obsolescence.
