

Rhythm Systems Earns Dual Directory Listings from Anthropic and OpenAI

The Rhythm AI Connector is now discoverable and connectable directly from inside Claude and ChatGPT

CHARLOTTE, NC, UNITED STATES, August 17, 2026 /EINPresswire.com/ -- [Rhythm Systems](#) has announced that the [Rhythm AI Connector](#), an MCP (Model Context Protocol) integration that connects the Rhythm strategy execution platform directly to AI tools, has been officially reviewed, approved, and listed by Anthropic in the Claude connector directory and by OpenAI in the ChatGPT app directory.

The Rhythm AI Connector is now discoverable on Claude and ChatGPT

Rhythm customers can now find and connect the Rhythm AI Connector directly from inside Claude or ChatGPT, without manual configuration or technical setup.

“

The Rhythm AI Connector puts live execution context directly into the AI tools your leadership team uses every day, so the AI you're already talking to finally knows your business.”

Ryan Walcott, Head of Products, Rhythm Systems

The listings follow the Rhythm AI Connector's general availability launch in June 2026. Anthropic and OpenAI each conducted independent reviews of the Rhythm MCP server before including it in their respective directories — marking the first time a strategy execution platform has earned native listings in the official directories of both companies.

Finding Rhythm Systems in the Claude and ChatGPT directories and connecting is straightforward — no MCP configuration or custom technical setup is required. On

some Claude (Team/Enterprise) and ChatGPT (Business/Enterprise) workspaces, an administrator may need to enable the Rhythm connector/app and approve tool permissions before members can connect. Rhythm is available as a directory connector on all Claude plans, including Free; Free accounts are limited to one connector slot. ChatGPT Free users can also

connect Rhythm from the directory without limit.

The timing reflects a critical window for mid-market companies. According to a joint study by VirtuuousAI and Chief Executive surveying more than 300 mid-market CEOs, only 7% are currently incorporating AI into their strategy execution. Official directory listings remove the last setup barrier for the other 93%, reducing the distance between exploring AI and using it for strategy to a matter of minutes.

The Rhythm AI Connector gives mid-market CEOs and their leadership teams direct access to live strategy data, execution health monitoring, and team coordination from inside the AI tools they already use, including Winning Moves, Red-Yellow-Green KPI status, Annual Plan priorities, and Week-in-Sync notes, live business context built on the Think Plan Do methodology Rhythm has refined for more than 20 years.

To connect Rhythm to Claude, Rhythm customers can search for Rhythm in the Claude connector directory. To connect Rhythm to ChatGPT, customers can search for Rhythm in the ChatGPT app directory. For more information, visit rhythmsystems.com/ai-connector or contact info@rhythmsystems.com.

About Rhythm Systems
