

Amazon Best Seller: The Cost of Belonging Explores the Human Reality Behind the U.S. Immigration System

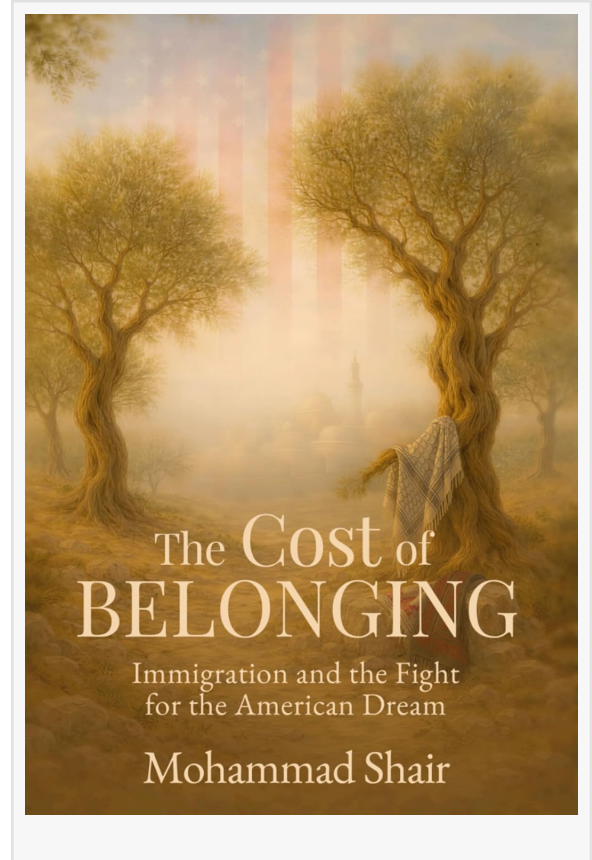

TAMPA, FL, UNITED STATES, August 17, 2026

/EINPresswire.com/ -- Author and immigration attorney [Mohammad Shair](#) has announced the global release of [The Cost of Belonging: Immigration and the Fight for the American Dream](#), which has achieved Amazon Best Seller status following its launch. Published by Game Changer Publishing, the book examines the intersection of immigration law, family, identity, and public policy through a combination of personal storytelling and practical legal insight.

Rather than approaching immigration solely through political debate or legal terminology, *The Cost of Belonging* presents the subject through an intergenerational narrative that illustrates the emotional, financial, and personal realities millions of immigrants and their families face. Alongside the narrative, the book offers an accessible overview of the U.S. immigration and naturalization system, helping readers better understand the processes behind visas, green cards, citizenship, removal proceedings, and other key aspects of immigration law.

The book aims to provide context for one of the most widely discussed and often misunderstood topics in American public life. By combining legal knowledge with human experience, it seeks to foster a more informed understanding of the challenges and decisions that shape the immigration journey.

Mohammad Shair is the founder of Mohammad Zohdi Shair Attorney and Counselor PA, where he focuses his practice on immigration law. Throughout his legal career, he has worked with individuals and families navigating complex immigration matters, witnessing firsthand the uncertainty, resilience, and hope that often accompany those experiences. His professional background forms the foundation for a book that bridges legal concepts and the personal stories behind them.

"The immigration system is often discussed through policies and statistics, but behind every case is a person, a family, and a story," said Mohammad Shair. "My hope was to create a resource that brings clarity to the legal process while honoring the human experiences that rarely receive the same attention."

While immigration remains a subject of ongoing national conversation, *The Cost of Belonging* intentionally avoids a partisan perspective. Instead, the book explains how the immigration system functions and how legal processes affect relationships, careers, identity, and long-term stability for those navigating the path toward permanent residency or citizenship.

The release comes at a time when immigration remains one of the most significant policy debates in the United States. By presenting legal information in straightforward language alongside relatable personal experiences, the book offers readers a clearer understanding of the practical realities of immigration law and the lasting impact of policy decisions on individuals and communities.

Mohammad Shair is dedicated to helping individuals, families, and businesses navigate U.S. immigration law through knowledgeable legal representation and practical guidance. Drawing on years of professional experience, he is committed to deepening public understanding of the immigration system and advocating for those pursuing opportunities in the United States.
