

Ellumina Cosmetic Clinic Introduces XERF for Non Surgical Skin Tightening in Sydney Australia

Sydney's Ellumina Cosmetic Clinic has introduced XERF, expanding its range of device based treatments alongside Ultherapy Prime.

SYDNEY, NSW, AUSTRALIA, August 16, 2026 /EINPresswire.com/ -- [Ellumina Cosmetic Clinic](https://www.ellumina.com.au) in Sydney has introduced XERF, a dual frequency monopolar radiofrequency based technology used for non surgical skin tightening.

Ellumina Cosmetic Clinic

XERF uses radiofrequency energy delivered at different tissue depths and may be considered for suitable patients seeking treatment for concerns including skin laxity. Treatment suitability and treatment parameters vary according to individual assessment.

Dr Mark Woo is a registered medical practitioner with experience in aesthetic medicine and is the principal of Ellumina Cosmetic Clinic. [Dr Woo](#) personally provides consultation and assessment for patients undergoing XERF treatment at the clinic and personally performs the treatment and operates the device.

Ellumina Cosmetic Clinic also provides Ultherapy Prime, a microfocused ultrasound treatment used for non surgical skin lifting and tightening. Ultherapy Prime uses real time ultrasound imaging to visualise tissue during treatment and delivers microfocused ultrasound energy at selected tissue depths.

Dr Woo also personally consults with and assesses patients undergoing Ultherapy Prime and personally performs the treatment at Ellumina Cosmetic Clinic.

XERF and Ultherapy Prime use different energy based technologies and may offer different treatment options depending on the patient's individual circumstances, treatment goals and clinical suitability.

As with cosmetic procedures generally, results can vary between individuals and cannot be

guaranteed. Treatment may not be suitable for everyone. Potential risks, side effects, recovery considerations and alternative treatment options should be discussed as part of an individual consultation before proceeding.

Further information about XERF and Ultherapy Prime, including treatment considerations and potential risks, is available through the Ellumina Cosmetic Clinic website here:

<https://www.elluminacosmetics.com.au/>

About Ellumina Cosmetic Clinic

Ellumina Cosmetic Clinic is a Sydney medical aesthetic clinic providing XERF, Ultherapy Prime and a range of general medical aesthetic and device based treatments. Treatment recommendations are based on individual consultation, assessment and clinical suitability.
