

EMN signs offtake term sheet with American 6K Energy for high-purity manganese

Term sheet supports EMN's project development as a secure, traceable Western source of high-purity manganese for North American battery supply chains

VANCOUVER, BRITISH COLUMBIA , CANADA, August 17, 2026 /EINPresswire.com/ -- [Euro](#)

“

6K Energy's successful testing and preliminary qualification of our material provide valuable validation of its quality and suitability for advanced battery material applications.”

*Martina Blahova, EMN
President and CEO*

[Manganese](#) Inc. (TSX-V and ASX: EMN) has entered a non-binding offtake term sheet with 6K Energy, a US-based cathode active materials producer, for the proposed sale of high-purity electrolytic manganese metal (HPEMM) from its Chvaletice Manganese Project in the Czech Republic.

The agreement follows 6K Energy's successful testing and preliminary qualification of high-purity manganese produced at Euro Manganese's Demonstration Plant, providing third-party validation of the material's quality and suitability for battery-material applications.

The term sheet contemplates a long-term, take-or-pay arrangement, with market-linked pricing designed to support the Project's debt-financing requirements while preserving upside exposure to strengthening manganese prices. Initial HPEMM volumes are expected from the Demonstration Plant beginning in 2028, ahead of a binding agreement the parties intend to negotiate.

The framework allows Euro Manganese and 6K Energy to explore broader opportunities for the Company's products within 6K Energy's operations, including potential supply intended to meet requirements under the U.S. National Defense Authorization Act.
