

ValorValuations and Azuli Announce Strategic Partnership to Reinvent the Broker Price Opinion

Valor Launches bpoAI at Valuation Expo 2026, Pairing a Veteran-Led Field Network with Azuli's Human-in-the-Loop AI Platform

LAS VEGAS, NV, UNITED STATES, August 17, 2026 /EINPresswire.com/ -- ValorValuations, a

“

Clients have had to choose between a fast valuation and a reliable one for far too long,”

Jeanette McLain

nationwide property valuation and inspection firm, and Azuli, a real estate valuation technology and solutions provider, today announced a strategic partnership to raise the standard for accuracy, consistency, and speed across the property valuation industry.

Unveiled today at Valuation Expo 2026 in Las Vegas, the companies are launching bpoAI, a next-generation Broker Price Opinion product available to order immediately.

Designed to replace legacy approaches to Broker Price Opinions that have long been criticized for inconsistent quality and unreliable turnaround times, bpoAI combines Valor’s nationwide, Veteran-focused inspection panel with Azuli’s AI-native, human-in-the-loop valuation platform. While AI accelerates research and standardizes complex data, human expertise remains strictly at the center. Every report is reviewed, adjusted, and signed off by a qualified real estate professional, pairing the speed of modern technology with rigorous human oversight to eliminate errors before reports reach clients. The result, according to the companies, is a premium valuation solution that is more consistent, more credible, and faster to produce than traditional BPOs.

Jeanette McLain, President of ValorValuations, said the partnership reflects a shared commitment to raising the bar in an industry that has too often accepted inconsistency as the price of speed. "Clients have had to choose between a fast valuation and a reliable one for far too long," McLain said. "bpoAI closes that gap. Pairing our Veteran-focused inspection panel with Azuli's technology gives lenders, AMCs, servicers, and investors a high-precision product built on both discipline and innovation."

Alex Villacorta, Ph.D., CEO of Azuli, emphasized that the collaboration aligns perfectly with the company's core mission to pair cutting-edge AI with expert human judgment. "We designed our

platform from day one to bring together the best of technology and human expertise: speed and scale on one side, and deep professional judgment on the other," Dr. Villacorta said. "We are incredibly proud to partner with ValorValuations, whose Veteran-focused inspection network brings exceptional discipline and field expertise to the table. bpoAI is the clearest expression yet of what advanced AI and dedicated, boots-on-the-ground professionals can accomplish together."

How bpoAI Works

bpoAI keeps a trained professional strictly at the center of every assignment. Rather than treating quality control as a separate, downstream review, Azuli's AI-native platform embeds automated validation checks directly into the valuation workflow. The platform standardizes data from multiple sources and catches potential discrepancies in real time to assist valuers as they conclude a value. Every report is ultimately reviewed, adjusted, and signed by a licensed real estate professional, delivering a remarkably consistent, highly defensible product far more efficiently than legacy BPO processes.

Extending Shared Missions

The partnership also extends both companies' broader missions. ValorValuations built its national inspection panel around U.S. military veterans, giving former service members a path into the property valuation profession while delivering clients objective, dependable field data from all 50 states.

Azuli was founded to modernize valuation workflows without sacrificing the deep market knowledge gained from decades of valuation experience. By combining advanced data science and AI with extensive industry experience, the company embodies its core philosophy: The Speed of AI. The Soul of an Appraiser.

About ValorValuations

ValorValuations is a nationwide property valuation and inspection firm delivering accurate, data-driven results for clients in all 50 states. Founded and led by experienced industry executives, the company is powered by a Veteran-focused inspection panel of military veterans, active-duty service members, and their spouses, reflecting its mission to support those who serve. About Azuli

Azuli is a real estate valuation technology and solutions company built on more than 90 years of combined leadership experience across AVM, BPO, appraisals, and Government-Sponsored Enterprise (GSE) workflows. The company was co-founded by CEO Alex Villacorta, Ph.D., and Chief Valuation Officer David DeMello, who both previously held key leadership roles at Clear Capital and HouseCanary, with DeMello also holding executive roles at Class Valuation. The executive team is further strengthened by Adrienne Lyne, who spent nearly 30 years in Senior Director roles at Freddie Mac. Leveraging this deep domain expertise, Azuli built its platform to act as a human-in-the-loop navigator, aggregating data from multiple sources and guiding valuation professionals through a standardized, defensible process. Azuli's mission is to deliver valuation reports clients can trust by pairing The Speed of AI with The Soul of an Appraiser.
