

Xceptor extends SaaS offering to Switzerland and Japan

LONDON, UNITED KINGDOM, August 18, 2026 /EINPresswire.com/ -- [Xceptor](https://www.xceptor.com), a global leader in data automation for capital markets, today announced it has launched sovereign-grade SaaS in Switzerland and Japan, two of the world's most demanding markets. The expansion reflects growing demand for solutions – including Xceptor's Data Automation, AI, and Confirmations solutions – that align with local data residency and regulatory requirements.

Dan Reid, CTO and Co-Founder at Xceptor

"Financial institutions operating in markets like Switzerland and Japan often have to navigate strict data sovereignty and technology outsourcing rules," said Dan Reid, CTO and Co-Founder at Xceptor. "The new SaaS regions give our clients greater flexibility to automate mission-critical operations while ensuring data remains within their desired local jurisdictions. This represents an important milestone in our global SaaS strategy, focused on supporting clients wherever they operate."

The move comes as capital markets firms increasingly rely on SaaS infrastructure. Xceptor's SaaS clients use its Data Automation, Confirmations, Tax, and Reconciliation solutions to process billions of rows of data, ingest terabytes of data, and seamlessly handle over 70,000 SFTP files each month. The platform processes more than one million inbound emails for clients every week.

This scale is underpinned by high service availability and dedicated, encrypted client environments, enabling firms to accelerate automation initiatives while maintaining the security, resilience, and regulatory compliance expected in capital markets.

"Increasing regulatory, operational, and technological pressures are accelerating SaaS usage across capital markets," Reid added. "With managed infrastructure and continuous software updates, firms can respond to industry demands, manage growing data volumes, and adopt AI

confidently within established governance and control frameworks – all at a faster time to value.”

Xceptor’s SaaS offering is delivered via Microsoft Azure with regional hosting across the US, EMEA, and APAC, now including dedicated regions in Switzerland and Japan. The platform is ISO 27001 and SOC 2 certified, with upgrades, security patches, and performance monitoring managed by Xceptor, eliminating costly upgrade cycles and reducing the need for specialist infrastructure teams.

ENDS

About Xceptor

Xceptor is a global leader in data automation for financial institutions, specialising in capital markets. Trusted by over 100 clients and 11,500 users across 60 countries, Xceptor empowers business users to take control of their data and streamline processes with AI, while minimising risk. Its highly configurable platform underpins purpose-built solutions for tax, reconciliations, and post-trade operations. For more information, visit www.xceptor.com.
