

FGREALTY Transforms Qatar Property Search with Redesigned Mobile App & Smarter Digital Tools

FGREALTY launches a redesigned mobile app with smarter search, interactive maps, enhanced listings and private viewing bookings across Qatar.

DOHA, QATAR, August 17, 2026

/EINPresswire.com/ -- New app update introduces interactive maps, improved search filters, enhanced listing details and private viewing bookings for property buyers, tenants and investors.

FGREALTY has enhanced its digital property-search offering with a redesigned mobile application that gives users new ways to discover and [evaluate properties across Qatar](#).

The latest FGREALTY Client update, released on July 8, 2026, introduces a redesigned interface, revamped search and filter functions, interactive map search, improved listing pages and easier private viewing bookings. The app is available through [Apple's App Store](#) and [Google Play](#), while FGREALTY's digital platform provides property listings across multiple Qatar locations, including The Pearl, Lusail and West Bay.

“

Technology should make property discovery more practical, transparent and connected, our app helps users search, compare and connect.”

*Serban G. Spirea, Founder
and CEO of FGREALTY*

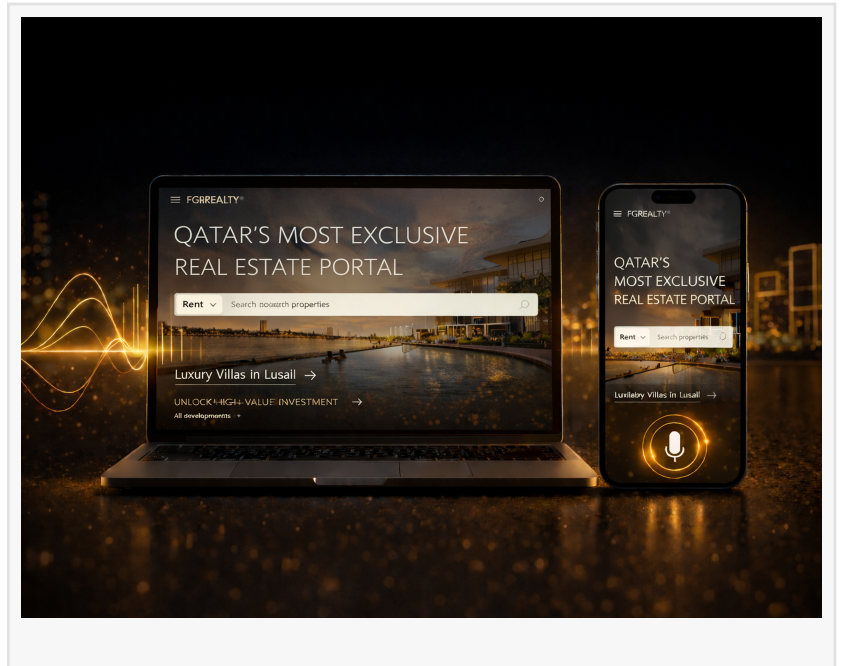

The interactive map functionality allows users to assess properties by location rather than relying solely on list-based results. This can help buyers and tenants compare communities and identify properties based on their

preferred areas and surrounding amenities.

Improved search and filtering tools also allow users to narrow property options according to

their requirements before reviewing individual listings. FGREALTY's online platform provides property information including location, size, furnishing, amenities, images and other listing details, while selected properties can be viewed and shortlisted for further assistance.

For international buyers, the app can serve as an initial research and property-discovery tool before traveling to Qatar. Users can identify suitable properties, review available information, communicate with FGREALTY representatives and arrange private viewings.

The FGREALTY app complements the company's broader digital property platform and brokerage services, which cover residential and commercial real estate across Qatar. Its online inventory includes apartments, villas, penthouses, offices, retail units, warehouses and other property categories.

The company emphasizes that digital tools are intended to support property discovery and shortlisting rather than replace legal, financial, or property-specific due diligence. Buyers and investors should independently verify ownership eligibility, documentation, applicable regulations, service charges, contractual terms and other relevant factors before committing to a transaction.

About FGREALTY

FGREALTY is a Qatar-based real estate brokerage providing residential and commercial property services to local and international clients. The company combines digital property-search tools with brokerage support, property listings, market information and viewing coordination across Qatar.
