

Won-Door Introduces EPD & HPD Documents to Simplify Project Submittals & Support Sustainable Construction

SALT LAKE CITY, UT, UNITED STATES, August 18, 2026 /EINPresswire.com/ -- Won-Door Corporation, a leading manufacturer of horizontal sliding fire and security door systems, announced the availability of [Environmental Product Declarations \(EPDs\)](#) and [Health Product Declarations \(HPDs\)](#) for select products, providing architects, specifiers, contractors and building owners with valuable documentation to support sustainable building projects and streamline the project submittal process.

Won-Door logo

As demand continues to grow for greater product transparency and sustainable building practices, EPDs and HPDs provide standardized information about a product's environmental impact and material composition. These documents can help design and construction professionals efficiently evaluate products while supporting project documentation requirements for green building initiatives and owner sustainability objectives.

“

We're providing our customers with the documentation they need to simplify project submittals, improve specification efficiency and support today's environmentally focused building practices.”

Johnny Cordero, Vice President and General Manager, Won-Door

“Architects and design professionals are increasingly seeking product information that supports both performance and sustainability goals,” said Johnny Cordero, Won-Door Vice President and General Manager. “By making EPDs and HPDs available for select products, we're providing our customers with the documentation they need to simplify project submittals, improve specification efficiency and support today's environmentally focused building practices.”

Environmental Product Declarations offer independently verified information about a product's environmental impacts throughout its lifecycle, while

Health Product Declarations disclose product ingredients and associated health information using an industry-recognized reporting format. Together, these resources help project teams make informed product selections and satisfy documentation requirements for many sustainable building programs.

The addition of EPDs and HPDs to the Document Library further expands Won-Door's commitment to delivering innovative door solutions that meet the evolving needs of architects, engineers, contractors and facility owners. By providing easy access to these documents, Won-Door helps reduce the time required to gather product information during design, specification and construction while supporting efficient project execution.

EPD and HPD documentation for eligible Won-Door products is available on the company's website at <https://wondoer.com/document-library/#code-compliance>, or by contacting your local [Horton distributor](#), and can be included as part of project submittals and construction documentation.

EPDs and HPDs are available for these Won-Door products:

Environmental Product Declaration:

- Won-Door FireGuard™
- Won-Door FireGuard™ Moveable FireWall

Health Product Declaration:

- Won-Door FireGuard™
- Won-Door FireGuard™ International
- Won-Door FireGuard™ Moveable FireWall
