

Aquanology Water Conditioning & Filtration Relocates to Larger Facility

Move to Lyons facility gives the Upstate New York water treatment company more inventory space and space for a future customer showroom

LYONS, NY, UNITED STATES, August 17, 2026 /EINPresswire.com/ -- Aquanology [Water](#)

“

Our goal is that customers will experience faster service times, whether the job is a water softener installation, a filtration system repair, or anything else.”

Arlyn Martin and Matthew Martin

[Conditioning](#) & Filtration has relocated to a larger, newly renovated facility at 7696 State Route 31 in Lyons, N.Y., one town east of the company’s former Newark location. The move follows more than a decade of growth serving families, farms, and businesses across Wayne County, the eastern suburbs of Rochester, and the Finger Lakes region.

While grateful for the steady growth in customer base over the years, the Aquanology team came to the realization that the prior location was maxed out, and it was time for more space. The new facility gives Aquanology more than

five times the inventory space it previously had. The added capacity will allow the company to offer better product availability, faster turnaround times, and shorter waits on supplies.

Brothers Arlyn Martin and Matthew Martin, the two owners of Aquanology, emphasize that the new address keeps the company within easy reach of its existing service area. “We’re not going far! Lyons is just one town east of Newark, which makes us just as accessible to our longtime customers and friends across our entire service area and the surrounding communities we’ve served for over a decade.”

“Our goal is that customers will experience faster service times, whether the job is a water softener installation, a filtration system repair, salt delivery, or service on a system Aquanology didn’t originally install.”

Since 2013, the team from Aquanology Water Conditioning & Filtration has been providing [water treatment](#) and [water purification](#) products and services to various regions of Upstate NY. In addition to residential services for homeowners, Aquanology works with agricultural operations and commercial clients, such as car washes, fire departments, and more.

Showroom and retail space planned

Renovations at the Lyons facility are ongoing. Once complete, Aquanology plans to open a showroom and dedicated retail space, a first for the company.

"This is a dream we've had for a long time: a place where customers can stop in, browse systems, ask questions face-to-face, and pick up supplies directly," the Martin brothers agree. "The Lyons location finally makes that possible."

"And we're profoundly grateful for every customer who has trusted us with their water quality over the years. We know we wouldn't be taking this step without them."

Aquanology's phone numbers, team, and approach to water treatment remain unchanged. The company will continue to offer upfront, personalized water treatment solutions built around each customer's water and budget, without high-pressure sales tactics or one-size-fits-all packages. Updates on the showroom will be announced as the renovation progresses.

New Location

7696 State Route 31

Lyons, NY 14489

Finger Lakes region: (315) 856-0483

Mohawk Valley region: (518) 906-4567

About Aquanology Water Conditioning & Filtration

Founded in 2013, Aquanology Water Conditioning & Filtration provides water treatment and water purification products and services to families, farms, and businesses throughout Upstate New York, including Wayne County, the eastern suburbs of Rochester, the Finger Lakes region, with a satellite location in the Mohawk Valley. Services include water softener installation, filtration system installation and repair, salt delivery, and service on existing water systems.
