

ON.ENERGY JOINS DATA CENTER ANTI-CONFERENCE USA 2026 AS PLATINUM SPONSOR

Power systems innovator brings resilient energy expertise to industry's premier gathering of digital infrastructure leaders

AUSTIN, TX, UNITED STATES, August 17, 2026 /EINPresswire.com/ -- The [Data Center Anti-Conference](#) (DCAC USA) is pleased to announce that [ON.energy](#) has joined the 2026 conference as a Platinum Sponsor.

ON.energy is building the backbone of energy and AI infrastructure, delivering resilient power solutions to enable grid-safe data centers across the US through their patented technology, AI UPS.

ON.energy expertise strengthens conversations that are becoming increasingly important across our industry, and we're proud to welcome them as a Platinum Sponsor of DCAC USA."

David Isaac, President, DCAC-Live

As demand for artificial intelligence, cloud computing, and digital services continues to accelerate, resilient power has become one of the defining challenges facing the industry. To meet this moment, ON.energy is currently deploying 3GW of AI UPS, which serves as a firewall, protecting the data center from the grid, and the grid from the data center.

The company's mission aligns closely with this year's DCAC USA theme, "Operation: Full Throttle – Forging the Fifth

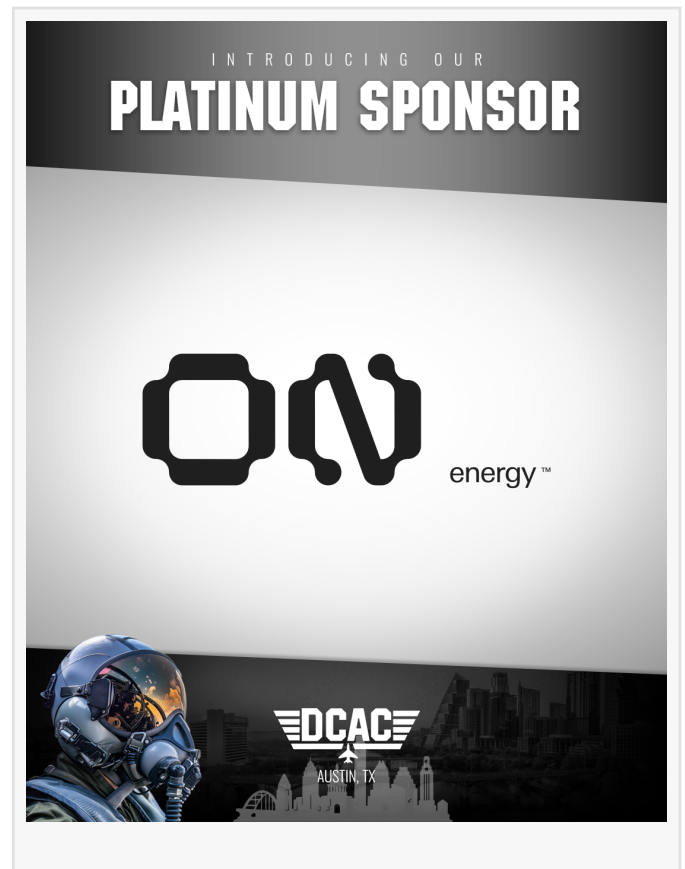

Utility and Battling Data Center Misconceptions", which explores the critical role digital infrastructure plays in modern society while fostering thoughtful dialogue around the industry's most pressing opportunities and challenges.

"Reliable power is no longer just an operational consideration, it's fundamental to the future of AI, digital infrastructure, and economic growth," said David Isaac, President of DCAC-Live.

"ON.energy expertise strengthens conversations that are becoming increasingly important across our industry, and we're proud to welcome them as a Platinum Sponsor of DCAC USA."

ON.energy is driven by a shared commitment to solving some of the world's most complex power challenges while advancing energy systems that are more resilient, cleaner, more abundant, and more affordable. That focus reflects DCAC's mission of bringing together leaders who are building practical solutions to support the next generation of digital infrastructure.

"Our customers are under pressure to deliver more capacity, more uptime, and more efficiency on tighter timelines than ever before," said Dax Kepshire, COO of ON.energy. "DCAC creates a rare space for candid conversations about those challenges and the power systems required to solve them."

Now in its 11th year, DCAC USA has become one of the digital infrastructure industry's fastest-growing conferences by replacing traditional presentations with authentic conversations, peer-to-peer collaboration, and relationship-driven networking. The 2026 conference will bring together executives, engineers, developers, investors, operators, technology providers, and policymakers committed to advancing the future of AI, data centers, and critical infrastructure.

DCAC USA 2026 will be held August 24–26 at ACL Live at The Moody Theater in Austin, Texas.

About ON.energy

ON.energy is building the backbone of energy and AI infrastructure powering grid-safe data centers and mission-critical facilities. The company supplies and operates hyperscale power systems that solve the toughest resilience challenges, delivering custom solutions for AI data centers, mission-critical facilities, and front-of-the-meter assets. Its track record spans industrial, manufacturing, infrastructure, transportation, and grid-scale storage. With patented technology and proprietary software, ON.energy develops projects worldwide that set new benchmarks for resilience. Visit [ON.energy](https://on.energy).

About DCAC USA

The Data Center Anti-Conference (DCAC) is where the digital infrastructure industry comes

together to build relationships, challenge conventional thinking, and advance the conversations shaping the future of data centers, AI, energy, and critical infrastructure. Known as the industry's "people's conference," DCAC provides an environment where authentic dialogue replaces scripted presentations and meaningful relationships drive lasting impact.
