

Recovery Beach Celebrates 30 Years of Addiction Treatment in Orange County Following Luxury Facility Renovation

Updated CA treatment center combines three decades of care with private rooms, chef-prepared meals, holistic therapy, & resort-style amenities.

GARDEN GROVE, CA, UNITED STATES, August 17, 2026 /EINPresswire.com/ -- Recovery Beach, an addiction treatment center in Orange County, California, is celebrating 30 years of helping individuals and families find hope, healing, and lasting recovery. The milestone follows a major facility renovation that has transformed Recovery Beach into a luxury treatment center while preserving the same community-centered mission that has guided its work for three decades.

Recovery Beach in Orange County, California August 2026

Located in Garden Grove, just a few miles from Disneyland Resort and about 5 minutes from Southern California beaches, Recovery Beach provides addiction treatment in a comfortable, supportive environment designed to help clients stabilize, rebuild, and begin recovery with dignity.

“For 30 years, Recovery Beach has been part of this community, helping people through some of the hardest moments of their lives,” said Greg Goushian, Vice President of Operations at Recovery Beach. “The renovation gives clients a more comfortable and elevated place to heal, but the heart of this facility hasn’t changed. We’re still here to save lives, support families, and help people realize that recovery is possible.”

The renovated facility includes private rooms, comfortable treatment areas, a chef’s kitchen, outdoor gathering spaces, a firepit, and thoughtfully designed areas for rest, reflection, and

connection. Recovery Beach also offers holistic therapies such as yoga, acupuncture, equine therapy, and sound bath therapy, giving clients additional ways to manage stress, reconnect with themselves, and support whole-person healing.

The renovation reflects Recovery Beach's belief that the treatment environment matters. For many people entering rehab, comfort, privacy, and emotional safety can make it easier to stay engaged in care during the vulnerable early stages of recovery.

"People tend to enter treatment feeling scared, exhausted, and unsure of what happens next," Goushian said. "We wanted to create a space that feels calm, welcoming, and clinically strong.

Luxury doesn't mean losing sight of the work. It means giving people an environment where they can focus fully on getting better."

Recovery Beach provides treatment for substance use disorders and [co-occurring mental health conditions](#), with services that include medical detox, [residential treatment](#), multiple forms of therapy, medication support when clinically appropriate, relapse prevention, and holistic wellness programming. The treatment team works with clients to address the underlying factors that may contribute to addiction, including trauma, mental health symptoms, stress, and relationship challenges.

“

For 30 years, Recovery Beach has been part of this community, helping people through some of the hardest times of their lives. The renovation provides clients with a more comfortable place to heal.”

*Greg Goushian, Vice President
of Operations*

Over the last 30 years, Recovery Beach has served people across Orange County, Southern California, and beyond by helping individuals and families navigate addiction treatment during moments of crisis, uncertainty, and

change. This complete renovation marks a new chapter for the facility while honoring its long-standing role in the local recovery community.

“Our clients deserve excellent clinical care, but they also deserve compassion, comfort, and respect,” Goushian said. “This renovation is about raising the standard while staying true to why

Recovery Beach exists in the first place. We're here to help people get their lives back."

As Recovery Beach celebrates its 30th anniversary, the facility remains focused on expanding access to compassionate, evidence-based addiction treatment and helping more people take the first step toward recovery.
