

Phos AI Labs Engineers Earn the Claude Certified Architect Foundations Credential

Phos AI Labs engineering team completed the CCA-F putting the firm among a small number of AI consulting firms serving mid-market companies with certified staff

MIAMI, FL, UNITED STATES, August 17, 2026 /EINPresswire.com/ -- Most [AI consulting](#) firms describe their expertise in adjectives: deep, proven, unmatched. This month, [Phos AI Labs](#) is describing its expertise in a credential instead. Multiple members of the firm's team completed the Claude Certified Architect Foundations program recently, a certification still new enough that most AI consulting firms serving mid-market companies (\$5M+ in annual revenue) don't yet have anyone on staff who holds it.

The credential is new, which is part of the point. Phos AI Labs' work with Claude takes different forms depending on the client: for some, that means deploying Claude for Teams; for others, it means building custom AI solutions on Anthropic's APIs. Either way, Claude is usually the model clients already trust before they call the firm.

A credentialed team changes what that work can promise: the difference between a consultant who can use a model well and one who has been tested on the architecture underneath it, the permissions, the data connections and the guardrails, before a client's whole company runs on it.

The certification lands alongside the firm's broader track record. The team has run more than 40+ AI Focused engagements across manufacturing, aviation, distribution, professional services, healthcare and creative industries, including work for Zapier, Coca-Cola, Medtronic and American Express.

Anthropic has since expanded the certification into a four-level track, added a nontechnical Associate certification for delivery and account roles, and extended certification validity from six months to twelve. Phos AI Labs said its team is already preparing for Architect Profession.

About Phos AI Labs

Phos AI Labs is an AI consulting and [AI training firm](#) for mid-market companies ready to move to AI-native operations. Founded in 2026 by Jesus Vargas, the firm takes clients through three phases: AI Foundations, Training and AI-Native Operations. Phos AI Labs is a practice of

LOW/CODE Agency.
