

Pillar of Hope Initiative Turns Every Home Inspection into an Opportunity to Give Back

TAMPA, FL, UNITED STATES, August 17, 2026 /EINPresswire.com/ -- Pillar To Post® Home Inspectors, North America's largest home inspection company, is bringing its commitment to community care to life through Pillar of Hope, its charitable social purpose initiative supporting families affected by breast cancer through donations, awareness, and community participation. This will be the second year of the initiative.

The initiative partners with [National Breast Cancer Foundation](#) Inc.® in the United States on behalf of The Tampa Home Office and Canadian Cancer Society on behalf of the Toronto Home Office. From September through November, a portion of proceeds from every participating home inspection is donated directly to the appropriate organization.

The campaign has already made a significant impact. In 2025 more than 120 franchise business owners joined Pillar of Hope, with nearly \$20,000 raised through their donations and matching efforts of Pillar To Post Corporate office. The initiative has also generated hundreds of conversations within local communities, helping raise awareness while creating a solid foundation for continued growth.

"Pillar To Post is proud to support National Breast Cancer Foundation, Inc. and Canadian Cancer Society, while continuing to expand the reach and impact of Pillar of Hope which represents what it means to be a community-minded company," said Charles Furlough, the company's President & CEO. "Our franchise owners and teams have the privilege of serving people in the communities where they live and work. By coming together, we can use every inspection as an opportunity to create a positive impact for families affected by breast cancer."

**Proud partner of
National Breast Cancer Foundation, Inc.®**

Breast Cancer Facts*

- 1 in 8 women in the United States will be diagnosed with breast cancer in her lifetime. That's more than 850 women every day.
- More than 4 million breast cancer survivors are alive in the U.S. today, the largest group of cancer survivors in the country.
- Early detection saves lives: When breast cancer is detected early in the localized stage, the 5-year relative survival rate is 99%.
- Breast cancer is the most common cancer in women, except for skin cancers.
