

DTS Solution Supports Kuwait Organizations Across CORF, SWIFT CSP and AI Governance Readiness

CBK's new CORF framework, mandatory SWIFT CSP checks, and AI governance rules are converging on Kuwait's banks and enterprises at once.

KUWAIT CITY, KUWAIT, August 24, 2026

/EINPresswire.com/ -- DTS Solution, a GCC cybersecurity advisory firm operating since 2011, is helping Kuwait's banking, finance, and enterprise sectors navigate a wave of current regulatory and AI governance demands through its established cybersecurity and compliance services, including penetration testing, ISO 42001 AI management system advisory, SWIFT CSP assessment, CBK CORF readiness, HawkEye managed SOC, GRC managed services, and cyber resilience assessment.

Vahe Daghljan, CEO and Co-Founder, and Krikor Totondjian, Chief Revenue Officer, at DTS Solution's Kuwait office.

Three pressures are converging on Kuwait organizations at once: the Central Bank of Kuwait's new Cyber and Operational Resilience Framework (CORF), which replaced the 2020 Cybersecurity Framework in December 2025 with 876 controls across 27 domains, growing adoption of AI systems inside regulated environments, and continued mandatory SWIFT Customer Security Programme obligations for correspondent banking members.

“

Kuwait's regulated sector is being asked to prove resilience, not just compliance, at the same time organizations are adopting AI faster than their governance can keep up.”

Vahe Daghljan, CEO and Co-Founder, DTS Solution

DTS Solution's Kuwait service portfolio includes:

- Penetration Testing: adversarial testing of networks, applications, and infrastructure to identify exploitable weaknesses before an attacker does

- [ISO 42001 \(AIMS\) Advisory](#): implementation and certification support for organizations

governing AI systems under the ISO/IEC 42001 AI management system standard

- SWIFT CSP Assessment: independent assessment against SWIFT's Customer Security

Programme controls for correspondent banking members

- [CBK CORF Readiness Program](#): gap assessment and remediation support against CBK's Cyber and Operational Resilience Framework

- HawkEye Managed SOC: 24x7 security operations center delivering extended detection and response

- GRC Managed Services: ongoing governance, risk, and compliance support across regional and international frameworks

- Cyber Resilience Assessment: evaluation of an organization's ability to withstand, respond to, and recover from cyber and operational disruptions

"Kuwait's regulated sector is being asked to prove resilience, not just compliance, at the same time organizations are adopting AI faster than their governance can keep up," said Vahe Daghljan, CEO and Co-Founder of DTS Solution. "Our Kuwait clients already work with us across CORF, SWIFT CSP, and AI governance through one advisory relationship instead of stitching together multiple vendors."

DTS Solution has supported cybersecurity, GRC, and managed security programs across the UAE, Saudi Arabia, and Kuwait since 2011. Its HawkEye Managed CSOC and XDR platform and Complyan GRC platform already support entities working against CBK, SAMA, CBB, and other regional frameworks alongside ISO 27001, NIST, PCI DSS, and SWIFT CSP. Kuwait organizations can request a consultation on any of the service lines through DTS Solution's Kuwait office.

About DTS Solution

DTS Solution is a GCC-based cybersecurity specialist founded in 2011, providing managed security operations, governance risk and compliance advisory, and cyber resilience services to banks, financial institutions, and enterprises across the UAE, Saudi Arabia, and Kuwait. Its services include HawkEye Managed CSOC and XDR, the Complyan GRC platform, vCISO advisory, penetration testing, and regulatory compliance programs spanning CBK, SAMA, ISO 27001, NIST, PCI DSS, and SWIFT CSP.
