

Devart Celebrates 29 Years With 20% Off Database Management, Data Connectivity and Productivity Tools

Devart marks 29 years of simplifying data work with continued innovation across database management, connectivity and AI-powered tools.

WILMINGTON, DE, UNITED STATES, August 18, 2026 /EINPresswire.com/ -- [Devart](#), a global provider of database management, data connectivity and developer productivity solutions, is marking its 29th anniversary with a 20% discount across its product portfolio through Aug. 31.

Founded in 1997, Devart has spent nearly three decades building software for developers, database administrators and data professionals as data technologies have continued to change. Today, more than 500,000 users rely on Devart products, including customers in 65% of Fortune 100 companies, across a portfolio of more than 140 products.

“

For 29 years, Devart has been built on an engineering mindset: solve real problems, build things that last, and never stop improving.”

Oleksii Honcharov, Head of Engineering at Devart

Over the years, Devart has focused on helping technical teams simplify complex data tasks, reduce manual work and connect applications and systems across different data environments. The company has grown from a database tools provider into a broader technology ecosystem covering database management, data connectivity and developer productivity. Its main product lines include [dbForge](#) database development and

management tools, ODBC Drivers, ADO.NET Data Providers, MCP Servers and other data solutions.

Recent product development reflects this direction. Devart introduced its [MCP Server](#) product

line to help AI assistants and agents work with databases and cloud data sources. The company also continued to expand dbForge as an AI-powered ecosystem for the entire database lifecycle, adding new AI capabilities and stronger PostgreSQL functionality.

"For 29 years, Devart has been built on an engineering mindset: solve real problems, build things that last, and never stop improving. Technologies change, but that mindset doesn't. Today, AI is opening a new chapter in software development, and we approach it the same way: understand where it can add real value and build tools people can rely on," said Oleksii Honcharov, Head of Engineering at Devart.

Devart's recent innovations earned industry recognition, including a Silver Globe Awards for Artificial Intelligence and five honors in the 2026 Database Trends and Applications Readers' Choice Awards.

To mark its 29th anniversary, Devart is offering 20% off its product portfolio through Aug. 31, 2026, one of the company's most significant promotional offers of the year.
