

LUMINOX REIMAGINES THE CLASSIC EXPEDITION WATCH FOR A NEW GENERATION OF EXPLORERS

NEW YORK, NY, UNITED STATES, August 18, 2026 /EINPresswire.com/ --

[Luminox](#), the Swiss Made watch brand known for building timepieces for demanding environments, introduces the new [Adventure Watch](#) 1300 Series, a modern field watch inspired by the rugged instruments carried on pioneering expeditions.

Drawing on the utilitarian character of early exploration watches, the new 43 mm Adventure Watch combines a deliberately timeworn aesthetic with the robust construction and readability expected from Luminox. Designed for those who continue to seek adventure beyond the familiar, the watch brings the spirit of historic exploration into a contemporary Swiss Made tool watch.

Central to its character is an IP Antique-bronze 316L stainless steel bezel, created to evoke the patina of equipment shaped by years of exposure to the elements. The aged-metal aesthetic continues onto a distinctive removable IP Antique-bronze stainless steel strap shield, paired with a choice of black or brown genuine leather straps. Together, these details give the watch the tactile, lived-in character of traditional expedition gear from the outset.

Luminox Adventure Watch 1300 Series

Adventure Watches

Behind its heritage-inspired appearance is a watch engineered for modern adventure. The 43 mm 316L stainless steel case houses a Swiss Made Ronda 515 quartz movement, protected by an anti-reflective sapphire crystal and a screw-in crown. Water resistance to 200 meters / 20 ATM extends its capability beyond the trail and into demanding environments where dependable equipment matters.

Readability remains fundamental to the design. [Luminox Light Technology](#) (LLT) illuminates key elements of the dial continuously, providing at-a-glance visibility in low-light and complete darkness for up to 25 years without needing to be charged by an external light source.

The result is a field watch that looks back to an era when exploration equipment was designed with a singular purpose: to work reliably, wherever the journey led. Rather than simply recreating that past, Luminox has reinterpreted its visual language through the performance standards of a contemporary tool watch.

From remote trails and changing weather to everyday journeys closer to home, the Adventure Watch is made for people who value equipment with both purpose and character – a watch designed not just to accompany an adventure, but to become part of its story.

About Luminox

XL.1301.LG

XL.1301

Luminox, the original self-powered luminous watch brand, is the watch of choice for global outdoor adventure icon Bear Grylls, U.S. Navy SEALs, The Icelandic Association for Search and Rescue (ICE-SAR), Lockheed Martin's F-117 Nighthawk™ stealth and other jet fighter pilots, elite forces worldwide and professional divers. The Luminox Light Technology (LLT) illumination system i.e., the tiny glass tubes that illuminate the dial and hands, ensure at-a-glance visibility of the time – in fact, they provide a constant glow 24/7, for up to 25 years under any light conditions, with visibility depending on the individual's eye vision and the color of the tubes. This is why we are calling this terrific feature "Always Visible – Glowing for up to 25 years". Always Visible, tough, powerful and accurate, Swiss-Made Luminox is the ultimate night vision gear for rugged outdoorsmen and other peak performers.
