

Valkit.ai Names Provalis Latam as Exclusive Regional Partner for Latin America

Partnership pairs Valkit.ai's Gen 2 digital validation platform with Provalis Latam's 25+ years of GMP expertise across Latin America

INDIANAPOLIS, IN, UNITED STATES, August 19, 2026 /EINPresswire.com/ -- Valkit.ai, the leading AI-native [digital validation platform](#) for the pharmaceutical, biotech, and medical device industries, today announced that [Provalis Latam](#) has been named its exclusive regional partner for Latin America. The partnership combines Valkit.ai's Generation 2 digital validation technology with Provalis Latam's deep regional presence and more than 25 years of GMP services experience across Latin American life sciences markets.

“

This partnership lets us combine world-class technology with local delivery, in our clients' language and on their terms”

Martín Orcoyen, Director of Operations, Provalis Latam

Headquartered in Buenos Aires, Argentina, with additional presence in Asunción, Paraguay, Provalis Latam serves pharmaceutical and regulated-industry clients throughout the region with consulting and compliance, Computer System Assurance (CSA), testing, contamination control strategy, and workforce development services. As Valkit.ai's exclusive regional partner, Provalis Latam will lead advisory, implementation, and digital validation delivery services for Valkit.ai customers across Latin America.

Latin America's life sciences sector continues to expand

rapidly, with growing domestic manufacturing capacity, increasing CDMO activity, and rising regulatory expectations from agencies such as ANMAT, ANVISA, and COFEPRIS driving demand for modern, risk-based validation approaches. Yet many organizations in the region remain reliant on paper-based or first-generation electronic validation systems that struggle to keep pace. The Valkit.ai-Provalis Latam partnership is designed to close that gap, giving regional manufacturers direct access to an AI-native validation platform backed by consultants who

understand both local regulatory realities and global GMP expectations.

Built for a Multilingual Region

Supporting the partnership is Valkit.ai's native multi-language capability. The platform offers multi-language navigation and built-in translation abilities, allowing teams to work in their preferred language while maintaining a single, consistent body of validation evidence. For multinational organizations operating across Latin America, this means local execution teams, regional quality functions, and global oversight groups can all work within the same system — without language becoming a barrier to collaboration, review, or inspection readiness.

"Provalis Latam brings exactly what this region deserves: an interdisciplinary team with genuine local understanding and a truly global approach to GMP delivery," said Hugh Devine, CEO of Valkit.ai. "Their CSA and validation practice is among the strongest in Latin America, and their commitment to raising the bar for the industry mirrors our own. We are delighted to make them our exclusive partner for the region."

Martín Orcoyen, Director of Operations at Provalis Latam and President of ISPE Argentina, added: "Latin American life sciences organizations are ready to move beyond legacy, document-centric validation. Valkit.ai's AI-native platform gives our consultants the ability to deliver standardized, inspection-ready validation evidence at a pace and quality the region has not seen before. This partnership lets us combine world-class technology with local delivery, in our clients' language and on their terms."

Regional Support Infrastructure Already in Place

The partnership is backed by Valkit.ai's existing regional infrastructure: the company maintains customer success and engineering resources throughout Central America, South America, and Barbados, ensuring customers across the region receive responsive, in-region support alongside Provalis Latam's on-the-ground delivery capability. Together, the two organizations offer Latin American life sciences companies a complete path from validation strategy and CSA advisory through platform implementation, execution, and ongoing support.

The Provalis Latam agreement is the latest step in Valkit.ai's global partner strategy, which pairs the platform with established, well-respected validation and commissioning firms in key geographies. Valkit.ai expects to announce further regional partnerships in the near future.
