

CDS Announces Partnership with ModeOne to Expand Remote Device Collection Capabilities

Partnership highlights CDS' commitment to delivering faster, more efficient, and defensible solutions to meet the evolving needs of clients

NEW YORK, NY, UNITED STATES, August 18, 2026 /EINPresswire.com/ -- Complete Discovery

“

By combining ModeOne's remote collection capabilities with CDS' expertise in digital forensics, we're providing clients with a faster, more efficient, and more predictable path to mobile evidence.”

Brad Berkshire, Vice President of Digital Forensics and Investigations, CDS

Source Inc. (CDS), a premier global leader in eDiscovery, serving top corporations, law firms, and government agencies for over 20 years, announced a new partnership with ModeOne, a leader in remote mobile data collection technology, bringing the next generation of remote device data collection technology directly into its digital forensics and investigation services.

Through this partnership, CDS will integrate ModeOne's patented remote collection platform into its service offerings, enabling the collection of targeted data from iOS and Android devices, without requiring physical possession of the device. This approach reduces collection timelines from days to hours, while lowering costs and increasing

efficiency without disrupting workflows.

We're excited to work alongside the expert team at CDS that shares our commitment to innovation and delivering better outcomes for clients,” said Matthew Rasmussen, CEO and Founder of ModeOne. “This endeavor will be making mobile collection more accessible to legal teams that need to move quickly without compromising on quality or privacy.”

“ModeOne's technology fundamentally changes what's possible in mobile device discovery,” said Brad Berkshire, Vice President of Digital Forensics and Investigations at CDS. “Whether supporting a legal hold, internal investigation, compliance review, or active litigation, organizations need fast access to defensible mobile data. By combining ModeOne's remote collection capabilities with CDS' expertise in digital forensics and eDiscovery workflows, we're providing clients with a faster, more efficient, and more predictable path to mobile evidence.”

The partnership proves CDS' commitment to innovation, giving clients access to more efficient mobile device collection, global scalability across jurisdictions, and targeted, defensible

extraction workflows. The enhanced mobile collection offering is available immediately to new and existing clients.
