

Key AI Innovators Announced for AI Governance World Conference in Las Vegas

Leading AI Governance Companies to Present at AI Governance World Las Vegas

LAS VEGAS, NV, UNITED STATES, August 18, 2026 /EINPresswire.com/ -- The [AI Governance](#) World Conference 2026 focusing on [AI readiness](#) and governance, set for October 12–14 at the Flamingo Hotel in Las Vegas, announces key AI governance innovators that will be speaking and exhibiting at [AI Governance World](#).

The event is headlined by two of the world's most influential technology lawyers: Bennett Borden, formerly of DLA Piper, now with the hybrid law and technology firm Clarion AI Law Partners, and Peter Stockburger, with Foley & Lardner, a Top 50 Global law firm.

Robert Smallwood, Chair, Certified Information Governance Officers Association

Top AI Innovators at AI Governance World include:

- Kiteworks - is a cybersecurity and data protection company headquartered in San Mateo, California. Founded in 1999 (formerly known as Accellion), it provides a unified platform that secures sensitive content communications, such as email, file sharing, and managed file transfer (MFT). The company serves thousands of global corporations and government agencies. The Kiteworks platform functions as a Private Content Network, allowing organizations to track, control, and secure every interaction with sensitive data

- NVISIONx - is a Data Security Posture Management (DSPM) company that offers a data risk intelligence platform. Founded in 2018 and headquartered in Santa Monica, California, the

platform uses AI and machine learning to inventory, classify, and analyze enterprise data. It helps businesses protect sensitive information while defensibly deleting obsolete data.

- RecordPoint - provides a unified data and AI governance platform. Founded in 2008, the company helps highly regulated organizations and government agencies manage compliance, reduce data risk, and safely scale AI operations across complex data estates. RecordPoint provides a centralized system to control data and prepare it for AI integration.

- ReLeaf Financial - is an innovative fintech startup that provides "Trust as a Service" for the Web 4.0 and Agentic AI era. The company's patented technology, Proof of Intent (POI), verifies whether digital and financial transactions are initiated by actual humans or by autonomous AI agents. The financial industry has traditionally relied on Two-Factor Authentication (2FA), which assumes a human is making the transaction. With the rise of autonomous, agentic AI, ReLeaf created its POI platform (US Patent 12,505,416) to immediately verify if real human intent is present at the moment of authorization. If human intent is verified, the transaction goes through; if an AI agent is detected without human authorization, the transaction is blocked.

“

Attendees at AI Governance World will have the opportunity to explore the latest in AI governance technologies to secure and control AI, which is crucial with the rise of autonomous AI agents.”

Robert Smallwood

- Valora Technologies - is a leading software and service provider of automated document data mining, AutoClassification, and content analytics. The company empowers large enterprises, government agencies, and legal firms to manage, govern, and secure vast amounts of data. Valora specializes in turning complex, unstructured data into organized, actionable information.

- LegalRM - is a software and IT consulting company that develops Information Governance and records

management solutions. Their flagship platform, iCompli, helps law firms and corporate organizations manage both physical and digital assets, automate retention and disposition, and ensure regulatory compliance.

- Triad Executive Advisors - is a strategy consulting firm that provides technology, governance,

and executive advisory services for healthcare organizations and other highly regulated industries. The firm helps leadership teams reduce operational complexity and strengthen risk management. Rather than just providing surface-level assessments, Triad embeds within a client's organization to implement solutions and remain accountable for durable, measurable results.

Robert Smallwood, Founder & Chair of the AI Governance World Conference, stated, "Attendees at AI Governance World will have the opportunity to 'lift the hood' on the latest in AI governance technologies to secure and control AI, which is especially important with the rise of autonomous AI agents."

AI Governance World Conference 2026 brings together top minds in AI governance, technology, and program management from diverse sectors such as law, healthcare, financial services, and government. Attendees can expect cutting-edge case studies, interactive workshops, technology deep dives, and invaluable networking with national and global experts from leading companies and organizations.

For more information and full conference details, visit the AI Governance World Conference 2026 website.

Don't miss this landmark event on the future of AI readiness and governance, innovation, and law—where the intersection of law and technology takes center stage.
