

DYU Announces European Availability of C9 Foldable E-Bike With Up to 150 km Range

The 20-inch folding commuter combines a 48V 15.6Ah battery, hydraulic disc brakes and a three-step fold for transport and compact storage.

ROTTERDAM, NETHERLANDS, August 19, 2026 /EINPresswire.com/ -- [DYU Bikes](#) today announced European availability of the [C9 foldable e-bike](#), a 20-inch commuter model designed to combine extended pedal-assist range with a frame that can be reduced for transport and storage.

DYU C9 foldable e-bike with long-range assistance.

The C9 uses a 250W motor and a removable 48V 15.6Ah lithium-ion battery. DYU lists a pedal-assist range of up to 150 km and a charging time of seven to eight hours. Actual range varies according to rider weight, route, weather, tire pressure, assistance level and other operating conditions.

“

The C9 was developed for riders who need long assisted range without giving up the storage advantages of a folding frame.”

DYU Bikes Spokesperson

Its three-step folding sequence lowers the stem, folds the pedals and closes the center frame joint. The resulting folded dimensions are listed as 970 x 465 x 760 mm. The bike weighs 30 kg and has a stated load capacity of 120 kg.

“The C9 was developed for riders who need long assisted

range without giving up the storage advantages of a folding frame,” said a DYU Bikes spokesperson.

For riding control, the C9 combines 20 x 3.0-inch tires, front suspension and hydraulic disc brakes. The model also includes front and rear lighting, a handlebar display and a rear rack. Optional front and rear baskets and a child-seat set allow the cargo setup to be adapted for different daily routines.

The bike is offered in green and white. Its adjustable saddle and upright layout are intended for commuting, local trips and recreational rides, while the folding frame can reduce the amount of storage space required at home or in a vehicle.

The current product specification lists a maximum assisted speed of 25 km/h and climbing support for inclines up to 15 degrees. Riders remain responsible for following the operating and equipment rules that apply in their local market.

The C9 is available through dyubikes.com for eligible European destinations, subject to stock and regional delivery coverage. Its addition gives DYU a long-range folding option alongside the company's smaller compact folders and full-size city models.

About DYU Bikes

DYU Bikes develops electric bicycles and electric utility products for urban travel, recreation and practical mobility. Its portfolio includes folding, lightweight, city and fat-tire e-bikes as well as the CampX electric folding wagon. Current specifications, accessories and regional availability are listed at dyubikes.com.
