

Southwest ISD Approves Typesy Under Student Software Agreement Approval

Southwest ISD Approves Typesy Under Software Agreement Approval under RFP 2223-121 covers software & educational software subscriptions through July 2028

SAN ANTONIO, TX, UNITED STATES, August 19, 2026 /EINPresswire.com/ -- Southwest

“

Software for students has to work across a wide range of ages and starting points — exactly what an adaptive program is built for. We're glad Southwest ISD now has that option with Typesy.”

*Rick Mesias, Sales Director at
eReflect*

Independent School District has approved Typesy, eReflect Inc.'s K-12 keyboarding and typing curriculum platform, under RFP Number 2223-121, which covers student software and educational software subscriptions. The agreement runs through July 31, 2028.

Software purchased specifically for student use tends to face a higher bar than general classroom technology — it needs to hold up across a wide range of ages and skill levels and actually get used consistently rather than sitting unopened after the first week.

[Typesy for Southwest ISD](#) is purpose-built for K-12 use, with lessons organized around grade-level typing goals and interactive exercises designed to keep younger and older students alike engaged. Teachers get reporting tools scaled for a single classroom rather than a whole district office, giving them a quick read on typing accuracy and speed alongside broader digital comfort, and the flexibility to assign lessons based on what a class needs at a given point in the year.

Southwest ISD's approval places Typesy directly within the district's student software category, giving campuses a straightforward path to adopting the program without a separate procurement process for each school.

The platform is also available to homeschool families and individual learners, though its core focus remains K-12 school-based and district-wide implementation. Southwest ISD campuses can incorporate Typesy into technology instruction, intervention support, or general classroom practice depending on each school's needs.
