

ShipToBox.com Expands AI-Powered U.S. Shopping, One Checkout and Global Delivery

AI-powered commerce connects U.S. shopping, secure payments, Buy For Me, package consolidation and global delivery for consumers and businesses.

NEW YORK, NY, UNITED STATES, August 19, 2026 /EINPresswire.com/ --

[ShipToBox.com](https://www.shiptobox.com) is expanding its AI-powered commerce experience to simplify how consumers and businesses shop from U.S. stores, manage purchases, pay securely and arrange delivery across the United States and international destinations.

ShipToBox.com — AI-powered U.S. shopping and global commerce.

Online shopping offers enormous choice, but buying from several retailers can create unnecessary friction. A customer purchasing electronics on Amazon, household products from Walmart, apparel from Target, bulk items from Costco, products from eBay, or merchandise from thousands of other U.S. stores may face separate carts, accounts, payments, packages and delivery decisions. International shoppers can face added challenges when a retailer does not ship directly to their country or does not accept their preferred payment method.

“

AI is transforming commerce. We're connecting shopping, payments and intelligent fulfillment into one experience built for consumers and businesses worldwide.”

ShipToBox.com

ShipToBox.com is designed to bring more of that journey into one connected experience. Customers can shop from eligible U.S. retailers, use [Buy For Me](#) purchasing assistance, access a U.S. shopping address, manage

incoming packages, request consolidation or repacking, compare available delivery choices and authorize domestic or international forwarding.

The experience is intended to help customers search less, manage fewer checkouts, and make more informed shipping decisions from one account.

The company's vision goes beyond traditional package forwarding. ShipToBox.com is developing an AI-powered global commerce layer connecting online shopping, payments, package intelligence and fulfillment for B2C and B2B2C commerce.

"Shopping across multiple stores should not require customers to manage multiple disconnected experiences," said Mike Ulker, Founder and CEO of ShipToBox.com. "Our goal is to use AI, secure payment technology and intelligent fulfillment to make U.S. shopping easier for an individual customer and more scalable for businesses."

AI-assisted technology supports package optimization by evaluating factors such as dimensions, weight, available box configurations, dimensional-weight considerations and delivery options when eligible packages are considered for consolidation. Rather than simply placing every purchase into one oversized box, the system can help identify practical configurations intended to reduce unnecessary packaging and improve shipment visibility before release.

Secure commerce is another part of the experience. Through financial-technology infrastructure powered by [PayToMe.co](https://paytome.co), ShipToBox.com supports payment automation, fraud-prevention and identity-verification capabilities for domestic and cross-border transactions. This combination of eCommerce, FinTech and fulfillment is designed to serve individual shoppers as well as resellers, SMBs and business partners.

For consumers, ShipToBox.com can simplify shopping across multiple U.S. websites through one account and coordinated package management. International customers can use a U.S. address to receive eligible purchases from merchants that may not offer direct international delivery. Where eligible, customers may also benefit from a sales-tax-free U.S. shopping address, subject to applicable transaction requirements and law.

For businesses, the platform can support product sourcing, multi-retailer purchasing, package consolidation, order management and distribution. Resellers and SMBs can purchase from multiple U.S. merchants, organize inventory flows, compare available shipping services and

An advertisement for ShipToBox.com. The background is a solid orange color. In the top left corner, there is a logo for "Ship To Box" with "US Mail Forwarding" written below it. In the top right corner, the website "www.shiptobox.com" is displayed in white. The central image shows a collection of electronic items: a laptop displaying the "FIFA WORLD CUP Qatar 2022" logo, a pair of black and white headphones, a white and black DualShock 5 game controller, and a white PlayStation 5 console. Below the image, the text "Get your new electronic item from the USA" is written in white. At the bottom of the advertisement, a white box contains the text: "ShipToBox.com helps consumers and businesses shop from U.S. retailers and arrange domestic or worldwide delivery."

direct eligible packages to one or multiple destinations. B2B2C partners can use ShipToBox.com's commerce, payment and fulfillment capabilities to support their customers without building each component independently.

The platform's multi-destination capabilities can also support families, gift buyers, resellers and businesses managing purchases for different recipients. Customers can consider delivery speed, shipping cost, package count and destination requirements before authorizing a shipment.

ShipToBox.com's evolution reflects a broader opportunity in cross-border eCommerce: connecting discovery and purchasing with the financial and fulfillment infrastructure required to complete the transaction. The company began by helping customers receive and forward U.S. purchases. Today, it is developing toward an intelligent commerce ecosystem combining multi-store U.S. shopping, Buy For Me, one-account management, secure payments, AI-assisted package consolidation and flexible domestic and worldwide delivery.

Ready to shop U.S. stores? Visit ShipToBox.com to create an account, access your U.S. shopping address, explore Buy For Me, consolidate eligible purchases and get a shipping quote for domestic or worldwide delivery.

About ShipToBox.com

The advertisement features a bright orange background with a grid layout. At the top left is the ShipToBox logo with the tagline 'US Mail Forwarding'. At the top right is the website URL 'www.shiptobox.com'. The main content is divided into two columns by a vertical line. The left column, titled 'How It Started', shows four individual items: a laptop, a pair of headphones, a smartwatch, and a smartphone. The right column, titled 'How It's Going', shows a single cardboard box with the ShipToBox logo and shipping labels. Below the grid is a white rounded rectangle containing the text 'The USA Shopping Has Never End'.

ShipToBox.com connects U.S. shopping with package management and flexible domestic or worldwide delivery in one commerce experience.

This advertisement is split into two panels. The left panel, titled 'ShipToBox AI Shopping Engine', shows a woman in a yellow sweater sitting cross-legged and using a laptop. To her right is a large smartphone screen displaying a 'SmartCart' interface with a 'BUY' button. Further right are logos for Amazon, Target, Best Buy, and Nike. The bottom of this panel reads 'Shop U.S. Black Friday Deals in One Checkout'. The right panel, also titled 'ShipToBox AI Shopping Engine', shows three cardboard boxes of different sizes. The largest box has the ShipToBox logo. The bottom of this panel reads 'Save Up to 80% on S'.

ShipToBox.com combines AI-powered shopping, secure payments and intelligent fulfillment for consumers, resellers, SMBs and B2B2C partners.

ShipToBox.com is an AI-powered global commerce company serving consumers, international shoppers, resellers, SMBs and B2B2C partners.
